Subject Index

P = Proceedings of the Anatomical Society of Great Britain and Ireland
(*dem*: Poster demonstration)

Accessory oculomotor nuclei, Fine structure of the interstitial nucleus of Cajal of the cat (Bianchi & Gioia) **187,** 141

Acetabulum, The thickness of the human acetabular subchondral plate and its correlation with articular cartilage thickness (Milz, *et al.*) **187,** 203, *P*

Acetylcholinesterase, The innervation of the human myocardium at birth (Chow, *et al.*) **187,** 107

Acrosome, Distribution of lectin binding in the testes of the musk shrew, *Sincus murinus* (Kurohmaru, *et al.*) **187,** 323

Actin, Alpha smooth muscle actin expression and white pulp compartmentalisation in normal and reactive human spleen (Wilkins, *et al.*) **187,** 206, *P*

Comparison of actin isoforms expressed during different passages of human endothelial cells in culture (Dye, *et al.*) **187,** 244, *dem*

Adenocarcinoma, Glycosylation of mucins in a cultured human colorectal epithelial cell model of the adenoma–carcinoma sequence (Corfield, *et al.*) **187,** 210, *P*

Adhesion molecules, Comparison of the dermal vessels and the expression of vascular adhesion molecules in the human fetal, normal adult and psoriatic skin (Perry, *et al.*) **187,** 244, *dem*

Adrenal gland, The pattern of innervation in the quail adrenal gland: an immunocytochemical and histochemical study (Parker, *et al.*) **187,** 199, *P*

Ageing, The effects of ageing on cutaneous wound healing in mammals (Aschcroft, *et al.*) **187,** 1

Quantitative enzyme histochemical studies on ageing neurons of the trigeminal ganglion of the rat (Adams, *et al.*) **187,** 200, *P*

The extracellular matrix of the hypogastric and 13th thoracic ganglia and lower urinary tract of young adult and aged rats (Warburton & Santer) **187,** 200, *P*

Nerve fibre pathology in the cervical vagus of the rat: effects of age (Soltanpour & Santer) **187,** 224, *dem*

Alcohol, Loss of myelinated axons is specific to the central nervous system in a mouse model of the fetal alcohol syndrome (Parson & Sojitra) **187,** 739

Aldose reductase inhibition, Experimental diabetes and the effects of insulin and an aldose reductase inhibitor on epithelial cell number and morphophenotype in rat small intestine (Zoubi, *et al.*) **187,** 233, *dem*

Effects of insulin and aldose reductase inhibitor on glomerular mesangial cells in streptozotocin-diabetic rats (Mayhew & Findlay) **187,** 233, *dem*

Alkaline phosphatase, Localisation of alkaline phosphatase in equine growth cartilage (Henson, *et al.*) **187,** 151

Fracture callus maturation and alkaline phosphatase expression in response to low level laser therapy (Clingen) **187,** 216, *P*

Alligator mississippiensis, Mathematical models for growth in alligator (*Alligator mississippiensis*) embryos developing at different incubation temperatures (Bardsley, *et al.*) **187,** 181

Alpha smooth muscle actin, Alpha smooth muscle actin expression and white pulp compartmentalisation in normal and reactive human spleen (Wilkins, *et al.*) **187,** 206, *P*

Alzheimer's disease, The apolipoprotein-E polymorphism and Alzheimer's disease: transcellular and differential effects on tangle and plaque formation (Ohm, *et al.*) **187,** 218, *P*

Alzheimer's disease: ultrastructural immunolabelling of brain lesions (Defossez, *et al.*) **187,** 218, *P*

Transneuronal changes suggest altered dendritic processing in Alzheimer's disease (Nitsch & Ohm) **187,** 219, *P*

Early Alzheimer-related pathology in the posterolateral part of the human hypothalmus (Schultz, *et al.*) **187,** 228, *dem*

Amygdaloid nucleus, Amygdala pathology in Parkinson's disease (Yilmazer, *et al.*) **187,** 219, *P*

Anatomical variations, An anatomical study and ontogenetic explanation of 23 cases with variations in the main pattern of the human brachio–antebrachial arteries (Rodríguez-Baeza, *et al.*) **187,** 473

Angiogenesis, Migration of endothelial cells in vitro: effects of glycolytic and oxidative metabolites (Murray & Wilson) **187,** 207, *P*

Migration of endothelial cells in vitro: effects of glycolytic and oxidative metabolites (Murray & Wilson) **187,** 207, *P*

Anionic glycosaminoglycan, Extracellular matrix, supramolecular organisation and shape (Scott) **187,** 259

Antebrachial arteries, An anatomical study and ontogenetic explanation of 23 cases with variations in the main pattern of the human brachio–antebrachial arteries (Rodríguez-Baeza, *et al.*) **187,** 473

Antibodies, Glycobiology: 'The function of sugar in the IgG molecule' (Dwek, *et al.*) **187,** 279

Aorta, Unusual cells isolated from bovine aorta are CD11a/CD18 positive (Spanel-Borowski, *et al.*) **187,** 211, *P*

Apolipoprotein E, The apolipoprotein-E polymorphism and Alzheimer's disease: transcellular and differential effects on tangle and plaque formation (Ohm, *et al.*) **187,** 218, *P*

Apoptosis, Cell death induced by gamma irradiation of developing skeletal muscle (Olivé, *et al.*) **187,** 127

Cell death in the developing murine hindbrain occurs after neural crest cell migration (Atkinson & Smith) **187,** 215, *P*

Apoptosis in the postnatal rat spinal cord (Davies, *et al.*) **187,** 223, *dem*

Articular cartilage, The thickness of the human acetabular subchondral plate and its correlation with articular cartilage thickness (Milz, *et al.*) **187,** 203, *P*

Three-dimensional surface analysis of young adult human articular cartilage (Bloebaum & Radley) **187,** 293

Cryoscanning electron microscopic study of the surface amorphous layer of articular cartilage (Kobayashi, *et al.*) **187,** 429

Atherogenesis, Arterial tortuosity in the femoropopliteal region during knee flexion: a magnetic resonance angiographic study (Wensing, *et al.*) **187,** 133

Atherosclerosis, Arterial tortuosity in the femoropopliteal region during knee flexion: a magnetic resonance angiographic study (Wensing, *et al.*) **187,** 133

Atrial natriuretic polypeptide, Cardiac musculature of the cranial vena cava in the common tree shrew (*Tupaia glis*) (Endo, *et al.*) **187,** 347

Autoimmunity, Mode of inflammatory cell infiltration in testes of mice injected with syngeneic testicular germ cells without adjuvant (Itoh, *et al.*) **187,** 671

Autonomic nervous system, The pattern of innervation in the quail adrenal gland: an immunocytochemical and histochemical study (Parker, *et al.*) **187,** 199, *P*

Distribution and interrelations between GABA and NADPH-diaphorase labelled neurons in rat autonomic ganglia (Day) **187,** 221, *P*

The anterior major pelvic ganglion and the micturition pathway: a double labelling and indirect immunofluorescence study in the rat (Skidmore) **187,** 226, *dem*

Axon loss, Loss of myelinated axons is specific to the central nervous system in a mouse model of the fetal alcohol syndrome (Parson & Sojitra) **187,** 739

Axonal atrophy, Influence of age on the late retrograde effects of sciatic nerve section in the rat (Kerezoudi, *et al.*) **187,** 27

Axons, Myosin V distribution in PC12 cells indicates a possible role at the growth cone (Davies) **187,** 221, *P*

Barrel cortex, VIP neurons in the rat barrel cortex receive specific thalamocortical input (Staiger, *et al.*) **187,** 214, *P*

Bat, Stereological methods for estimating the functional surfaces of the chiropteran small intestine (Makanya, *et al.*) **187,** 361
Behaviour, The influence of open field colour on motor behaviour in the mouse—a behavioural study (Maleck, *et al.*) **187,** 245, *dem*
The duration of trials as an important factor in the sex-dependent evaluation of open field motor activity in Wistar rats (Maleck, *et al.*) **187,** 245
Bipedalism, A comparison of spinal ligaments—differences between bipeds and quadrupeds (Jiang, *et al.*) **187,** 85
Bipeds, A comparison of spinal ligaments—differences between bipeds and quadrupeds (Jiang, *et al.*) **187,** 85
Birds, Comparative morphology of the proventriculus of 3 species of Australian passerines, *Lichmera indistincta*, *Zosterops lateralis* and *Poephila gutata* (Ogunkoya & Cook) **187,** 202, *P*
Blood flow reduction, Collateral arterial blood supply to the pregnant uterus in the sheep (Mounts, *et al.*) **187,** 191
Body shape, Determinants of body shape in primates: man, chimpanzee, gibbon and galago (Witte, *et al.*) **187,** 201, *P*
Bone, The effect of low level laser therapy on neuropeptide expression during fracture repair in the murine femur (Jordan) **187,** 216, *P*
Fracture callus maturation and alkaline phosphatase expression in response to low level laser therapy (Clingen) **187,** 216, *P*
Effect of recombinant human Bone Morphogenetic Protein 2 (rh BMP 2) on endothelial cell migration and proliferation (Mulhern) **187,** 217, *P*
An evaluation of an optimal serum supplementation regimen for the culture of human osteoblasts prior to reimplantation therapy (McCabe) **187,** 217, *P*
Book Reviews
Chivers, D. J. & Langer, P. *The Digestive System in Mammals. Food, Form and Function.*, 1994 eds (revd by Carr) **187,** 505
Jamil, M. & Mitchell, B. S. *MCQs in Anatomy for the FRCS Part* 1., 1995 (revd by Kirk) **187,** 506
Jones, E. G. & Diamond, I. T. *Cerebral Cortex*, vol. 11. *The Barrel Cortex of Rodents.*, 1995 eds (revd by Garey) **187,** 505
Brachial artery, An anatomical study and ontogenetic explanation of 23 cases with variations in the main pattern of the human brachio–antebrachial arteries (Rodríguez-Baeza, *et al.*) **187,** 473
Brachial plexus, A comparative study of primary afferents from the brachial and cervical plexuses to the external cuneate nucleus of gerbils (Lan, *et al.*) **187,** 115
Brachio–antebrachial arterial system, An anatomical study and ontogenetic explanation of 23 cases with variations in the main pattern of the human brachio–antebrachial arteries (Rodríguez-Baeza, *et al.*) **187,** 473
Brainstem, Pattern of norepinephrine-binding in the brainstem and diencephalon of hibernating and euthermic European hamsters (*Cricetus cricetus*) (Krug, *et al.*) **187,** 228, *dem*
Breast, Mammary gland reactions in the rat predictive of (anti)progestational activity in humans (Michna, *et al.*) **187,** 239, *dem*
Breast cancer, Nerve damage and other causes of chronic pain after breast cancer surgery (Okasha, *et al.*) **187,** 220, *P*
Breast carcinoma, Ultrastructural demonstration of *Helix pomatia* agglutinin (HPA) binding to human breast cancer cell lines (Mitchell, *et al.*) **187,** 232, *dem*
Alterations of the nucleolar organiser regions (AgNORs) in the human MX-1 xenograft after thermochemotherapy as detected by automatic image analysis (Schmitt, *et al.*) **187,** 234, *dem*
Semiautomatic morphometry of capillaries in human xenografts after thermochemotherapy (Schmitt, *et al.*) **187,** 234, *dem*
Bronchial nerve endings, Nerve endings in bronchi of the dog that react with antibodies against neurofilament protein (Yamamoto, *et al.*) **187,** 59
Bronchus, Nerve endings in bronchi of the dog that react with antibodies against neurofilament protein (Yamamoto, *et al.*) **187,** 59
Buccal mucosa, The innervation of the rat buccal mucosa (Müller) **187,** 236, *dem*
Cadherin, Effect of histamine and tumour necrosis factor on the distribution and localisation of cadherin-5 and PECAM-1 in the perfused human term placental microvessels (Leach, *et al.*) **187,** 206, *P*
Caesarian section, Pelvises from Caesarean operations performed on living women in Edinburgh during the late 18th and early 19th century (Kaufman) **187,** 237, *dem*
Calbindin D28k, Calbindin D28k in the olivocerebellar projection. A light and electron microscope study (Scotti) **187,** 649
Calcium binding proteins, Calbindin D28k in the olivocerebellar projection. A light and electron microscope study (Scotti) **187,** 649
Capillaries, Semiautomatic morphometry of capillaries in human xenografts after thermochemotherapy (Schmitt, *et al.*) **187,** 234, *dem*
Carbohydrates, Superovulation affects glucosamine trisaccharides in the glycocalyx of the rat endometrium at the time of implantation (Peverini & Kramer) **187,** 487
Carcinoma, Glycosylation of mucins in a cultured human colorectal epithelial cell model of the adenoma–carcinoma sequence (Corfield, *et al.*) **187,** 210, *P*
Ultrastructure of tumours derived from the human colon cancer cell line HT29 developing in severe combined immunodeficiency (SCID) mice (Mitchell, *et al.*) **187,** 231, *dem*
Ultrastructural demonstration of *Helix pomatia* agglutinin (HPA) binding to human breast cancer cell lines (Mitchell, *et al.*) **187,** 232, *dem*
Alterations of the nucleolar organiser regions (AgNORs) in the human MX-1 xenograft after thermochemotherapy as detected by automatic image analysis (Schmitt, *et al.*) **187,** 234, *dem*
Semiautomatic morphometry of capillaries in human xenografts after thermochemotherapy (Schmitt, *et al.*) **187,** 234, *dem*
Cardiac innervation, The innervation of the human myocardium at birth (Chow, *et al.*) **187,** 107
Cardiac myocytes, Cardiac musculature of the cranial vena cava in the common tree shrew (*Tupaia glis*) (Endo, *et al.*) **187,** 347
Carpal tunnel syndrome, Carpal tunnel syndrome caused by an anomalous palmaris profundus tendon (Server, *et al.*) **187,** 197
Cartilage, The thickness of the human acetabular subchondral plate and its correlation with articular cartilage thickness (Milz, *et al.*) **187,** 203, *P*
Characterisation of glycoconjugate expression during development of Meckel's cartilage (Koepp, *et al.*) **187,** 229, *dem*
Glycoconjugate expression during hyaline cartilage development in the rat (Zschäbitz, *et al.*) **187,** 230, *dem*
Nondestructive, noninvasive assessment of articular cartilage thickness using magnetic resonance tomography (MRT) (Eckstein, *et al.*) **187,** 235, *dem*
Three-dimensional surface analysis of young adult human articular cartilage (Bloebaum & Radley) **187,** 293
Cryoscanning electron microscopic study of the surface amorphous layer of articular cartilage (Kobayashi, *et al.*) **187,** 429
Fibrocartilage associated with human tendons and their pulleys (Benjamin, *et al.*) **187,** 625
Glycoconjugate expression of chondrocytes and perichondrium during hyaline cartilage development in the rat (Zschäbitz, *et al.*) **187,** 67
Cat, Fine structure of the interstitial nucleus of Cajal of the cat (Bianchi & Gioia) **187,** 141
Excitatory and inhibitory horizontal connections in the cat visual cortex—a structural basis for functional specificity (Eysel & Kisvarday) **187,** 213, *P*
Compartmentalisation of cortical neurons by synapses and neurotransmitter receptors (Somogyi) **187,** 213, *P*
Neurotransmitters and neuropeptides in the mesencephalic

trigeminal nucleus of the cat (Chouchkov & Lazarov) **187,** 229, *dem*
Characterisation of the neurosensory elements of the feline cranial cruciate ligament (Koch, *et al.*) **187,** 353
The arrangement of motor nuclei in the ventral horn of the cat spinal cord in relation to the innervation of trunk muscles (Kida, *et al.*) **187,** 509, *dem*
Cell death, Cell death in the developing murine hindbrain occurs after neural crest cell migration (Atkinson & Smith) **187,** 215, *P*
Cementoblasts, Cytoskeletal elements in cementoblasts of the developing rat periodontium (Webb, *et al.*) **187,** 204, *P*
Centre–surround interaction, Cells and circuits contributing to functional properties in area V1 of macaque monkey cerebral cortex: bases for neuroanatomically realistic models (Lund, *et al.*) **187,** 563
Cerebellar climing fibres, Calbindin D28k in the olivocerebellar projection. A light and electron microscope study (Scotti) **187,** 649
Cerebellum, Spatial distribution of afferent synpases on cultured cerebellar granule cells (Fox, *et al.*) **187,** 225, *dem*
Developmental changes of glycine receptor expression in the rat cerebellum (Lorke, *et al.*) **187,** 227, *dem*
The probable role of the external granular cells in the maturation of the Purkinje cells in mice (Malta) **187,** 228, *dem*
The neurochemical maturation of the rabbit cerebellum (Lossi, *et al.*) **187,** 709
Cerebral cortex, Understanding the cortex through the hippocampus: lamina-specific connections of rat hippocampal neurons (Frotscher, *et al.*) **187,** 212, *P*
Excitatory and inhibitory horizontal connections in the cat visual cortex—a structural basis for functional specificity (Eysel & Kisvarday) **187,** 213, *P*
The sensorimotor cortex of the human and monkey brain: an integrative approach using MRI, histology and receptor autoradiography (Zilles, *et al.*) **187,** 213, *P*
Compartmentalisation of cortical neurons by synapses and neurotransmitter receptors (Somogyi) **187,** 213, *P*
Cells and circuits contributing to functional properties in macaque monkey visual cortex, areas V1 and V2 (Lund, *et al.*) **187,** 214, *P*
VIP neurons in the rat barrel cortex receive specific thalamocortical input (Staiger, *et al.*) **187,** 214, *P*
Segregation and integration of specialised visual pathways in primate cortex (Shipp & Zeki) **187,** 214, *P*
Lamina-specific sprouting in the rat fascia dentata after entorhinal lesion: tracing of sprouting fibres with *Phaseolus vulgaris* leucoagglutinin (PHAL) (Deller, *et al.*) **187,** 215, *P*
Cytoskeletal changes after photothrombosis in the rat brain (Bidman, *et al.*) **187,** 215, *P*
Differences in the distribution patterns of transmitter receptors in the human motor and somatosensory cortex as revealed by a new method (Geyer, *et al.*) **187,** 224, *dem*
Encephalometry suggests the significance of the left superior frontal gyrus in man (Malobabic) **187,** 229, *dem*
Segregation and convergence of specialised pathways in macaque monkey visual cortex (Shipp & Zeki) **187,** 547
Anatomical evidence concerning the role of the thalamus in corticocortical communication: a brief review (Guillery) **187,** 583
Cervical plexus, A comparative study of primary afferents from the brachial and cervical plexuses to the external cuneate nucleus of gerbils (Lan, *et al.*) **187,** 115
Chemotropism, Tissue culture analysis of chemotropism during peripheral nerve regeneration (Gu, *et al.*) **187,** 201, *P*
Chick embryo, The prechordal plate and the oropharyngeal membrane in embryos of man and birds (Hinrichsen, *et al.*) **187,** 203, *P*
Haemostasis in the early chick embryo (Aitkenhead) **187,** 217, *P*
Tissue interactions during caudad migration of the wolffian duct in chick-quail chimaeras (Erzner, *et al.*) **187,** 240, *dem*
Wound healing studies in the chick embryo notochord (England & Gouda) **187,** 241, *dem*
On the development of the anterior head region in avian embryos (Seifert, *et al.*) **187,** 241, *dem*
Chick–quail chimeras, Tissue interactions during caudad migration of the wolffian duct in chick-quail chimaeras (Erzner, *et al.*) **187,** 240, *dem*
Chondroitin sulphate, Characterisation of the morphogenetic course and secretion of two different types of mucoid material by granulated metrial gland/lymphokine-activated killer cells (Dyugovskaya, *et al.*) **187,** 693
Choroid plexus, Expression and upregulation of transferrin receptors and iron uptake in the epiplexus cells of different aged rats injected with lipopolysaccharide and interferon-gamma (Lu, *et al.*) **187,** 603
Chromatolysis, Influence of age on the late retrograde effects of sciatic nerve section in the rat (Kerezoudi, *et al.*) **187,** 27
Cilia, The effect of lectins on ciliary beat frequency in the human respiratory tract (Adam, *et al.*) **187,** 232, *dem*
Circadian rhythms, Circadian gene expression in the rat photoneuroendocrine system: is ICER a clock gene? (Stehle, *et al.*) **187,** 197, *P*
Nitric oxide: a transmitter in the hamster circadian system (Reuss & Decker) **187,** 198, *P*
Cleidocervical muscle, Case report: cleidocervical or levator claviculae muscle. A new embryological explanation as to its origin (Leon, *et al.*) **187,** 503
Colchicine, Microglial response after application of colchicine on the hypoglossal nerve in rats (Mader, *et al.*) **187,** 223, *dem*
Collagen, Collagen fibril remodelling in regenerating tendon of the immature rat under ad libitum and restricted diet regimes (Hassan & Matthew) **187,** 205, *P*
Disposition of collagen fibrils in human tendons (Stolinski) **187,** 235, *dem*
Extracellular matrix, supramolecular organisation and shape (Scott) **187,** 259
Tendon response to tensile stress: an ultrastructural investigation of collagen: proteoglycan interactions in stressed tendon (Cribb & Scott) **187,** 423
Collagen fibril diameter, Collagen fibril diameter distribution in patellar tendon autografts after posterior cruciate ligament reconstruction in sheep: changes over time (Moeller, *et al.*) **187,** 161
Collateral circulation, Collateral arterial blood supply to the pregnant uterus in the sheep (Mounts, *et al.*) **187,** 191
Colon carcinoma, Ultrastructure of tumours derived from the human colon cancer cell line HT29 developing in severe combined immunodeficiency (SCID) mice (Mitchell, *et al.*) **187,** 231, *dem*
Colorectal epithelium, Glycosylation of mucins in a cultured human colorectal epithelial cell model of the adenoma–carcinoma sequence (Corfield, *et al.*) **187,** 210, *P*
Physical and biosynthetic studies on the large mucins from human intestinal cell lines (Sheehan, *et al.*) **187,** 210, *P*
Colour, The influence of open field colour on motor behaviour in the mouse—a behavioural study (Maleck, *et al.*) **187,** 245, *dem*
Commissural afferents, Understanding the cortex through the hippocampus: lamina-specific connections of the rat hippocampal neurons (Frotscher, *et al.*) **187,** 539
Connective tissue, Functional morphology of the dorsal phalangeal connective tissue in the human finger (Bade, *et al.*) **187,** 236, *dem*
Contrast sensitivity, Cells and circuits contributing to functional properties in area V1 of macaque monkey cerebral cortex: bases for neuroanatomically realistic models (Lund, *et al.*) **187,** 563
Cornea, Extracellular matrix, supramolecular organisation and shape (Scott) **187,** 259
Coronary arteries, Anomalous course of the right coronary artery in relation to the posterior interventricular vein (Nerantzis, *et al.*) **187,** 497
Corpus callosum, Encephalometry suggests the significance of the left superior frontal gyrus in man (Malobabic) **187,** 229, *dem*
Cortical architectonics, Mapping of human and macaque

sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515

Cow, Unusual cells isolated from bovine aorta are CD11a/CD18 positive (Spanel-Borowski, *et al.*) **187,** 211, *P*

Craniofacial development, Effects of retinyl palmitate and retinoic acid on craniofacial morphogenesis: biological roles of oligosaccharide-lectin interactions during osteogenesis of the maxilla and mandible (Zchäbitz, *et al.*) **187,** 212, *P*

Supernumerary teeth and an internal cartilaginous unicorn-like structure are craniofacial features seen in the homozygous Small eye (Sey) mouse (Kaufman) **187,** 237, *dem*

Craniofacial malformation, Retinoic acid teratogenic pathways inducing skeletal embryological malformations in the craniofacial area. Histochemical and microradiological analysis (Emmanouil-Nikoloussi, *et al.*) **187,** 208, *P*

Cricopharyngeus, Muscle fibre type and elastin distribution in human cricopharyngeus (Matthews) **187,** 221, *P*

Cruciate ligament, Characterisation of the neurosensory elements of the feline cranial cruciate ligament (Koch, *et al.*) **187,** 353

Cruciate ligaments, The fibre bundle anatomy of human cruciate ligaments (Mommersteeg, *et al.*) **187,** 461

Cupromeronic blue, Tendon response to tensile stress: an ultrastructural investigation of collagen: proteoglycan interactions in stressed tendon (Cribb & Scott) **187,** 423

Cytoarchitectonics, Mapping of human and macaque sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515

Cytokines, The effects of ageing on cutaneous wound healing in mammals (Aschcroft, *et al.*) **187,** 1

Cytoskeleton, Cytoskeletal elements in cementoblasts of the developing rat periodontium (Webb, *et al.*) **187,** 204, *P*

Gephyrin: a bridge between neurotransmitter receptors and the cytoskeleton (Kirsch & Betz) **187,** 215, *P*

Cytoskeletal changes after photothrombosis in the rat brain (Bidman, *et al.*) **187,** 215, *P*

Immunocytochemical localisation of microtuble associated proteins 1b and 2 in the developing rat spinal cord (Oudega, *et al.*) **187,** 723

Cytox stripes, Segregation and convergence of specialised pathways in macaque monkey visual cortex (Shipp & Zeki) **187,** 547

Decorin, Immunolocalisation of decorin within rat palatal shelves prior to and after shelf elevation (Moxham, *et al.*) **187,** 232, *dem*

Deer, Quantitative analysis of intraepithelial large granular lymphocyte distribution and maternofetal cellular interactions in the synepitheliochorial placenta of the deer (Lee, *et al.*) **187,** 445

Demyelination, Influence of age on the late retrograde effects of sciatic nerve section in the rat (Kerezoudi, *et al.*) **187,** 27

Dentate fascia, Lamina-specific sprouting in the rat fascia dentata after entorhinal lesion: tracing of sprouting fibres with *Phaseolus vulgaris* leucoagglutinin (PHAL) (Deller, *et al.*) **187,** 215, *P*

Dermal blood vessels, Comparison of the dermal vessels and the expression of vascular adhesion molecules in the human fetal, normal adult and psoriatic skin (Perry, *et al.*) **187,** 244, *dem*

Dermatan sulphate, Tendon response to tensile stress: an ultrastructural investigation of collagen: proteoglycan interactions in stressed tendon (Cribb & Scott) **187,** 423

Dermochondan (dermatan) sulphate, Extracellular matrix, supramolecular organisation and shape (Scott) **187,** 259

Diabetes mellitus, Experimental diabetes and the effects of insulin and an aldose reductase inhibitor on epithelial cell number and morphophenotype in rat small intestine (Zoubi, *et al.*) **187,** 233, *dem*

Effects of insulin and aldose reductase inhibitor on glomerular mesangial cells in streptozotocin-diabetic rats (Mayhew & Findlay) **187,** 233, *dem*

Didelphis albiventris, Immunocytochemical study of the ontogeny of the marsupial *Didelphis albiventris* immune system (Coutinho, *et al.*) **187,** 37

Diencephalon, Pattern of norepinephrine-binding in the brainstem and diencephalon of hibernating and euthermic European hamsters (*Cricetus cricetus*) (Krug, *et al.*) **187,** 228, *dem*

DNA fragmentation, Cell death induced by gamma irradiation of developing skeletal muscle (Olivé, *et al.*) **187,** 127

Dog, Pathways of blood flow to and through superficial lymph nodes in the dog (Beltz & Heath) **187,** 413

Nerve endings in bronchi of the dog that react with antibodies against neurofilament protein (Yamamoto, *et al.*) **187,** 59

Intercellular and lymphatic pathways of the canine palatine tonsils (Beltz & Heath) **187,** 93

Dopamine β-hydroxylase, The innervation of the human myocardium at birth (Chow, *et al.*) **187,** 107

Dorsal root ganglia, Influence of age on the late retrograde effects of sciatic nerve section in the rat (Kerezoudi, *et al.*) **187,** 27

Dystrophin, Expression of dystrophin in developing muscle (Barbet, *et al.*) **187,** 206, *P*

Elastin, Muscle fibre type and elastin distribution in human cricopharyngeus (Matthews) **187,** 221, *P*

Embryo growth, Mathematical models for growth in alligator (*Alligator mississippiensis*) embryos developing at different incubation temperatures (Bardsley, *et al.*) **187,** 181

Embryogenesis, Concepts and terminology associated with the embryonic 'middle layer' (Collins & Billett) **187,** 240, *dem*

Embryonic disc, Axis definition in the embryonic disk of the rabbit in vivo and under growth factor mediation in vitro (Viebahn, *et al.*) **187,** 203, *P*

Embryonic implantation, Superovulation affects glucosamine trisaccharides in the glycocalyx of the rat endometrium at the time of implantation (Peverini & Kramer) **187,** 487

Encephalometry, Encephalometry suggests the significance of the left superior frontal gyrus in man (Malobabic) **187,** 229, *dem*

Endometrium, Superovulation affects glucosamine trisaccharides in the glycocalyx of the rat endometrium at the time of implantation (Peverini & Kramer) **187,** 487

Endothelium, Effect of recombinant human Bone Morphogenetic Protein 2 (rh BMP 2) on endothelial cell migration and proliferation (Mulhern) **187,** 217, *P*

A morphometric analysis of tight junctions in endothelial cell paracellular clefts of rat pial microvessels (Caffella & Firth) **187,** 235, *dem*

Comparison of actin isoforms expressed during different passages of human endothelial cells in culture (Dye, *et al.*) **187,** 244, *dem*

Enteric nervous system, A scanning microscopical study of the isolated myenteric plexus in newborn rats (Schäjer & Mestres-Ventura) **187,** 200, *P*

Cholinergic, somatostatin-immunoreactive interneurons in the guinea pig intestine: morphology, ultrastructure, connections and projections (Portbury, *et al.*) **187,** 303

An ultrastructural study of the submucous plexus of guinea pig intestine after unilateral vagotomy (Wang, *et al.*) **187,** 613

Entorhinal afferents, Understanding the cortex through the hippocampus: lamina-specific connections of the rat hippocampal neurons (Frotscher, *et al.*) **187,** 539

Entorhinal cortex, Lamina-specific sprouting in the rat fascia dentata after entorhinal lesion: tracing of sprouting fibres with *Phaseolus vulgaris* leucoagglutinin (PHAL) (Deller, *et al.*) **187,** 215, *P*

Epiplexus cells, Expression and upregulation of transferrin receptors and iron uptake in the epiplexus cells of different aged rats injected with lipopolysaccharide and interferon-gamma (Lu, *et al.*) **187,** 603

Epithelium, Physical and biosynthetic studies on the large mucins from human intestinal cell lines (Sheehan, *et al.*) **187,** 210, *P*

Glycosylation of mucins in a cultured human colorectal epithelial cell model of the adenoma–carcinoma sequence (Corfield, *et al.*) **187,** 210, *P*

Immunocytochemical localisation of lysozyme in epithelial cells

of the rat parotid gland (Staneva-Dobrovski & Zanger) **187,** 211, *P*
Strategies for carbohydrate analysis of glycoproteins in epithelial tissues (Leathem) **187,** 211, *P*
Lectins as markers for the basal cells of the human respiratory epithelium (Bals) **187,** 231, *dem*
Experimental autoimmune orchitis, Mode of inflammatory cell infiltration in testes of mice injected with syngeneic testicular germ cells without adjuvant (Itoh, *et al.*) **187,** 671
External cuneate nucleus, A comparative study of primary afferents from the brachial and cervical plexuses to the external cuneate nucleus of gerbils (Lan, *et al.*) **187,** 115
Extracellular matrix, The extracellular matrix of the hypogastric and 13th thoracic ganglia and lower urinary tract of young adult and aged rats (Warburton & Santer) **187,** 200, *P*
The extracellular matrix of the capsule of the proximal interphalangeal (PIP) joint of the human finger (Lewis, *et al.*) **187,** 205, *P*
Proteoglycans and the organisation of extracellular matrix (Scott) **187,** 208, *P*
Extracellular matrix, supramolecular organisation and shape (Scott) **187,** 259
Localisation and cellular origin of hyaluronectin (Ponting & Kumar) **187,** 331

Facial development, Ultrastructural features of mesenchymal cells within the facial processes forming the intermaxillary segment of the rat (Symons & Moxham) **187,** 241
Facial nerve, Cortical response of neuron-specific enolase after peripheral lesion of the facial nerve (Schubert, *et al.*) **187,** 223, *dem*
Plasticity of axosomatic GABA-ergic synapses in the hypoglossal nucleus after hypoglossal-facial anastomosis in the rat (Lebek, *et al.*) **187,** 224, *dem*
CGRP and galanin-like immunoreactive motoneurons in the axotomised facial nucleus of adult and newborn rats (Desilva, *et al.*) **187,** 225, *dem*
Facial shape, Fourier analysis of human soft tissue facial shape: sex differences in normal adults (Ferrario, *et al.*) **187,** 593
Fascia dentata, Lamina-specific sprouting in the rat fascia dentata after entorhinal lesion: tracing of sprouting fibres with *Phaseolus vulgaris* leucoagglutinin (PHAL) (Deller, *et al.*) **187,** 215, *P*
Femoral artery, Arterial tortuosity in the femoropopliteal region during knee flexion: a magnetic resonance angiographic study (Wensing, *et al.*) **187,** 133
Fetal alcohol syndrome, Atrophy of myelinated axons following a gestational alcohol insult in a mouse model of the fetal alcohol syndrome is specific to the central nervous system (Parson & Sojitra) **187,** 220, *P*
Loss of myelinated axons is specific to the central nervous system in a mouse model of the fetal alcohol syndrome (Parson & Sojitra) **187,** 739
Fibre type analysis, Histochemical and morphometric characteristics of the normal human vastus medialis longus and vastus medialis obliquus muscles (Travnik, *et al.*) **187,** 403
Fibroblasts, Fine particles of titanium, titanium alloy and cobalt-chrome-molybdenum alloy cause damage by direct contact with cells in vitro (Evans & Love) **187,** 243, *dem*
Ultrastructure of the zinc iodide–osmic acid stained cells in guinea pig small intestine (Zhou & Komuro) **187,** 481
Fibrocartilage, Fibrocartilage associated with human tendons and their pulleys (Benjamin, *et al.*) **187,** 625
Finger, The extracellular matrix of the capsule of the proximal interphalangeal (PIP) joint of the human finger (Lewis, *et al.*) **187,** 205, *P*
Functional morphology of the dorsal phalangeal connective tissue in the human finger (Bade, *et al.*) **187,** 236, *dem*
Finger development, Distribution patterns of endogenous lectins during finger development in man (Schmidt, *et al.*) **187,** 230, *dem*
Fish, Observations on the topology of the forebrain of the Pacific hagfish, *Eptatretus stouti* (Tusch, *et al.*) **187,** 227, *dem*
Flutamide, The effects of prenatal flutamide on testicular descent and adult testicular morphology in the Albino Swiss rat (Kassim, *et al.*) **187,** 237, *dem*
Forebrain, Observations on the topology of the forebrain of the Pacific hagfish, *Eptatretus stouti* (Tusch, *et al.*) **187,** 227, *dem*
Fourier analysis, Fourier analysis of human soft tissue facial shape: sex differences in normal adults (Ferrario, *et al.*) **187,** 593
Fracture repair, Fracture callus maturation and alkaline phosphatase expression in response to low level laser therapy (Clingen) **187,** 216, *P*
The effect of low level laser therapy on neuropeptide expression during fracture repair in the murine femur (Jordan) **187,** 216, *P*
Freezing, Experiences with slam freezing and high pressure freezing (Lemke, *et al.*) **187,** 243, *dem*
Frog, Inhibition of serotonin uptake selectively destroys illuminated pineal photoreceptor cells in *Rana esculenta* (Hartwig, *et al.*) **187,** 197, *P*

GABA, Distribution and interrelations between GABA and NADPH-diaphorase labelled neurons in rat autonomic ganglia (Day) **187,** 221, *P*
GABAergic synapses, Plasticity of axosomatic GABA-ergic synapses in the hypoglossal nucleus after hypoglossal-facial anastomosis in the rat (Lebek, *et al.*) **187,** 224, *dem*
Gamma irradiation, Cell death induced by gamma irradiation of developing skeletal muscle (Olivé, *et al.*) **187,** 127
The effects of gamma-irradiation on serotonin-containing endocrine cells of the murine small intestine (McCullough, *et al.*) **187,** 242, *dem*
Gastrointestinal tract, Early uptake of polystyrene latex microparticles (1·88 μm) across the gastrointestinal tract of the rat (Hazzard, *et al.*) **187,** 242, *dem*
Gephyrin, Gephyrin: a bridge between neurotransmitter receptors and the cytoskeleton (Kirsch & Betz) **187,** 215, *P*
Gerbil, A comparative study of primary afferents from the brachial and cervical plexuses to the external cuneate nucleus of gerbils (Lan, *et al.*) **187,** 115
Calbindin D28k in the olivocerebellar projection. A light and electron microscope study (Scotti) **187,** 649
Glia, The neurochemical maturation of the rabbit cerebellum (Lossi, *et al.*) **187,** 709
Glycine receptors, Developmental changes of glycine receptor expression in the rat cerebellum (Lorke, *et al.*) **187,** 227, *dem*
Glycobiology, Glycobiology—towards understanding the function of sugars (Dwerk) **187,** 210, *P*
Glycocalyx, Superovulation affects glucosamine trisaccharides in the glycocalyx of the rat endometrium at the time of implantation (Peverini & Kramer) **187,** 487
Glycococonjugates, Glycoconjugate expression during hyaline cartilage development in the rat (Zschäbitz, *et al.*) **187,** 230, *dem*
Glycoconjugates, Characterisation of glycoconjugate expression during development of Meckel's cartilage (Koepp, *et al.*) **187,** 229, *dem*
Histochemistry of glycoconjugates during fetal development of the human vertebral column (Khaw, *et al.*) **187,** 230, *dem*
Glycoconjugate expression of chondrocytes and perichondrium during hyaline cartilage development in the rat (Zschäbitz, *et al.*) **187,** 67
Glycoproteins, Strategies for carbohydrate analysis of glycoproteins in epithelial tissues (Leathem) **187,** 211, *P*
Glycosylation, Glycobiology: 'The function of sugar in the IgG molecule' (Dwek, *et al.*) **187,** 279
Golgi tendon organs, Characterisation of the neurosensory elements of the feline cranial cruciate ligament (Koch, *et al.*) **187,** 353
Gonads, The effect of transforming growth factor-β1 on developing mouse gonads in vitro (Mackay, *et al.*) **187,** 238, *dem*
Granulated metrial gland cells, Lectin binding studies of mouse granulated metrial gland cells (Webster & Stewart) **187,** 233, *dem*

Granule cells, Spatial distribution of afferent synpases on cultured cerebellar granule cells (Fox, *et al.*) **187,** 225, *dem*
Growth, Mathematical models for growth in alligator (*Alligator mississippiensis*) embryos developing at different incubation temperatures (Bardsley, *et al.*) **187,** 181
Growth cones, Myosin V distribution in PC12 cells indicates a possible role at the growth cone (Davies) **187,** 221, *P*
Growth factors, Axis definition in the embryonic disk of the rabbit in vivo and under growth factor mediation in vitro (Viebahn, *et al.*) **187,** 203, *P*
Growth plate, Localisation of alkaline phosphatase in equine growth cartilage (Henson, *et al.*) **187,** 151
Guinea pig, Changes of the sensory airway innervation in actively sensitised and challenged guinea pigs (Fischer & Kummer) **187,** 200, *P*
Cholinergic, somatostatin-immunoreactive interneurons in the guinea pig intestine: morphology, ultrastructure, connections and projections (Portbury, *et al.*) **187,** 303
Ultrastructure of the zinc iodide–osmic acid stained cells in guinea pig small intestine (Zhou & Komuro) **187,** 481
An ultrastructural study of the submucous plexus of guinea pig intestine after unilateral vagotomy (Wang, *et al.*) **187,** 613

Haematopoiesis, A direct relationship between the population size and the proliferative activity of early blood cell precursors in murine fetal liver (Thomas & Blair) **187,** 204, *P*
Haemostasis, Haemostasis in the early chick embryo (Aitkenhead) **187,** 217, *P*
Hamster, Nitric oxide: a transmitter in the hamster circadian system (Reuss & Decker) **187,** 198, *P*
Hibernation related reactivity pattern of the central nervous somatostatin system in European hamsters (Nürnberger, *et al.*) **187,** 198, *P*
Pattern of norepinephrine-binding in the brainstem and diencephalon of hibernating and euthermic European hamsters (*Cricetus cricetus*) (Krug, *et al.*) **187,** 228, *dem*
Harmonic analysis, Fourier analysis of human soft tissue facial shape: sex differences in normal adults (Ferrario, *et al.*) **187,** 593
Head development, On the development of the anterior head region in avian embryos (Seifert, *et al.*) **187,** 241, *dem*
Heart, The innervation of the human myocardium at birth (Chow, *et al.*) **187,** 107
Anomalous course of the right coronary artery in relation to the posterior interventricular vein (Nerantzis, *et al.*) **187,** 497
A stereological method for estimating the total number of ventricular myocyte nuclei in fetal and postnatal hearts (Austin, *et al.*) **187,** 641
Hernia repair, Reinforcement of the abdominal wall using polypropylene mesh in laparoscopic inguinal hernia repair (Van Mameren, *et al.*) **187,** 202, *P*
Hibernation, Hibernation related reactivity pattern of the central nervous somatostatin system in European hamsters (Nürnberger, *et al.*) **187,** 198, *P*
Pattern of norepinephrine-binding in the brainstem and diencephalon of hibernating and euthermic European hamsters (*Cricetus cricetus*) (Krug, *et al.*) **187,** 228, *dem*
High endothelial venules, A study on binding of suspended nodal lymphocytes to high endothelial venules in sections of frozen rat lymph nodes (Sainte-Marien & Peng) **187,** 47
Hindbrain, Cell death in the developing murine hindbrain occurs after neural crest cell migration (Atkinson & Smith) **187,** 215, *P*
Hippocampus, Understanding the cortex through the hippocampus: lamina-specific connections of rat hippocampal neurons (Frotscher, *et al.*) **187,** 212, *P*
Effects of long-term malnutrition and rehabilitation on the hippocampal formation of the adult rat. A morphometric study (Andrade, *et al.*) **187,** 379
Understanding the cortex through the hippocampus: lamina-specific connections of the rat hippocampal neurons (Frotscher, *et al.*) **187,** 539
Histamine, Effect of histamine and tumour necrosis factor on the distribution and localisation of cadherin-5 and PECAM-1 in the perfused human term placental microvessels (Leach, *et al.*) **187,** 206, *P*
Human, Cryoscanning electron microscopic study of the surface amorphous layer of articular cartilage (Kobayashi, *et al.*) **187,** 429
Human facial form, Fourier analysis of human soft tissue facial shape: sex differences in normal adults (Ferrario, *et al.*) **187,** 593
Humeroulnar joint, Quantification of humeroulnar joint space width and contact areas at various loads and flexion angles (Eckstein, *et al.*) **187,** 202, *P*
Hyaluronan, Extracellular matrix, supramolecular organisation and shape (Scott) **187,** 259
Localisation and cellular origin of hyaluronectin (Ponting & Kumar) **187,** 331
Hyaluronan-binding proteins, Localisation and cellular origin of hyaluronectin (Ponting & Kumar) **187,** 331
Hyaluronate, Synthesis and degradation of hyaluronate by synovia (Prehm) **187,** 208, *P*
Hyaluronectin, Localisation and cellular origin of hyaluronectin (Ponting & Kumar) **187,** 331
Hypoglossal nerve, Microglial response after application of colchicine on the hypoglossal nerve in rats (Mader, *et al.*) **187,** 223, *dem*
Plasticity of axosomatic GABA-ergic synapses in the hypoglossal nucleus after hypoglossal-facial anastomosis in the rat (Lebek, *et al.*) **187,** 224, *dem*
Course of the caudal hypoglossal rootlet through the vertebral artery (De Caro, *et al.*) **187,** 499
Hypothalamus, Circadian gene expression in the rat photoneuroendocrine system: is ICER a clock gene? (Stehle, *et al.*) **187,** 197, *P*
Early Alzheimer-related pathology in the posterolateral part of the human hypothalmus (Schultz, *et al.*) **187,** 228, *dem*
Hypothyroidism, The probable role of the external granular cells in the maturation of the Purkinje cells in mice (Malta) **187,** 228, *dem*

ICER, Circadian gene expression in the rat photoneuroendocrine system: is ICER a clock gene? (Stehle, *et al.*) **187,** 197, *P*
Immunodeficiency, Ultrastructure of tumours derived from the human colon cancer cell line HT29 developing in severe combined immunodeficiency (SCID) mice (Mitchell, *et al.*) **187,** 231, *dem*
Immunohistochemistry, Development of peptide-containing nerves in the human fetal prostate gland (Jen & Dixon) **187,** 169
Incubation temperature, Mathematical models for growth in alligator (*Alligator mississippiensis*) embryos developing at different incubation temperatures (Bardsley, *et al.*) **187,** 181
Inferior olivary nucleus, Calbindin D28k in the olivocerebellar projection. A light and electron microscope study (Scotti) **187,** 649
Inguinal hernia, Reinforcement of the abdominal wall using polypropylene mesh in laparoscopic inguinal hernia repair (Van Mameren, *et al.*) **187,** 202, *P*
Insulin, Experimental diabetes and the effects of insulin and an aldose reductase inhibitor on epithelial cell number and morphophenotype in rat small intestine (Zoubi, *et al.*) **187,** 233, *dem*
Integrins, Expression of integrins in porcine gastric mucosa: comparison of in vivo and in vitro findings (Giebel, *et al.*) **187,** 243, *dem*
Intercellular spaces, Intercellular and lymphatic pathways of the canine palatine tonsils (Beltz & Heath) **187,** 93
Interferon-gamma, Expression and upregulation of transferrin receptors and iron uptake in the epiplexus cells of different aged rats injected with lipopolysaccharide and interferon-gamma (Lu, *et al.*) **187,** 603
Interleukin-2, Characterisation of the morphogenetic course and secretion of two different types of mucoid material by granulated metrial gland/lymphokine-activated killer cells (Dyugovskaya, *et al.*) **187,** 693
Interneurons, Cholinergic, somatostatin-immunoreactive interneurons in the guinea pig intestine: morphology, ultrastructure, connections and projections (Portbury, *et al.*) **187,** 303

Interstitial cells of Cajal, Ultrastructure of the zinc iodide–osmic acid stained cells in guinea pig small intestine (Zhou & Komuro) **187,** 481
Interstitial nucleus of Cajal, Fine structure of the interstitial nucleus of Cajal of the cat (Bianchi & Gioia) **187,** 141
Intestine, Intestinal uptake of particulates: bulk maceration and histometric epifluorescence study of particule size dependency (Hodges, *et al.*) **187,** 207, *P*
Morphological and parameter profiles of mammalian organs (Carr, *et al.*) **187,** 207, *P*
Cholinergic, somatostatin-immunoreactive interneurons in the guinea pig intestine: morphology, ultrastructure, connections and projections (Portbury, *et al.*) **187,** 303
Stereological methods for estimating the functional surfaces of the chiropteran small intestine (Makanya, *et al.*) **187,** 361
Ultrastructure of the zinc iodide–osmic acid stained cells in guinea pig small intestine (Zhou & Komuro) **187,** 481
An ultrastructural study of the submucous plexus of guinea pig intestine after unilateral vagotomy (Wang, *et al.*) **187,** 613
Intestines, Physical and biosynthetic studies on the large mucins from human intestinal cell lines (Sheehan, *et al.*) **187,** 210, *P*
Glycosylation of mucins in a cultured human colorectal epithelial cell model of the adenoma–carcinoma sequence (Corfield, *et al.*) **187,** 210, *P*
Intraepidermal nerve fibres, Regional differences of intraepidermal nerve fibres in the skin of the rat (Müller) **187,** 199, *P*
Iron uptake, Expression and upregulation of transferrin receptors and iron uptake in the epiplexus cells of different aged rats injected with lipopolysaccharide and interferon-gamma (Lu, *et al.*) **187,** 603

Joints, Quantification of humeroulnar joint space width and contact areas at various loads and flexion angles (Eckstein, *et al.*) **187,** 202, *P*
The thickness of the human acetabular subchondral plate and its correlation with articular cartilage thickness (Milz, *et al.*) **187,** 203, *P*
The extracellular matrix of the capsule of the proximal interphalangeal (PIP) joint of the human finger (Lewis, *et al.*) **187,** 205, *P*
Synthesis and degradation of hyaluronate by synovia (Prehm) **187,** 208, *P*

Keratan sulphate, Extracellular matrix, supramolecular organisation and shape (Scott) **187,** 259
Kidney, Effects of insulin and aldose reductase inhibitor on glomerular mesangial cells in streptozotocin-diabetic rats (Mayhew & Findlay) **187,** 233, *dem*
Knee, Characterisation of the neurosensory elements of the feline cranial cruciate ligament (Koch, *et al.*) **187,** 353
Knee joint, Collagen fibril diameter distribution in patellar tendon autografts after posterior cruciate ligament reconstruction in sheep: changes over time (Moeller, *et al.*) **187,** 161
Cryoscanning electron microscopic study of the surface amorphous layer of articular cartilage (Kobayashi, *et al.*) **187,** 429
The fibre bundle anatomy of human cruciate ligaments (Mommersteeg, *et al.*) **187,** 461

Laparoscopy, Reinforcement of the abdominal wall using polypropylene mesh in laparoscopic inguinal hernia repair (Van Mameren, *et al.*) **187,** 202, *P*
Large granular lymphocytes, Quantitative analysis of intraepithelial large granular lymphocyte distribution and maternofetal cellular interactions in the synepitheliochorial placenta of the deer (Lee, *et al.*) **187,** 445
Characterisation of the morphogenetic course and secretion of two different types of mucoid material by granulated metrial gland/lymphokine-activated killer cells (Dyugovskaya, *et al.*) **187,** 693
Laser therapy, The effect of low level laser therapy on neuropeptide expression during fracture repair in the murine femur (Jordan) **187,** 216, *P*
Fracture callus maturation and alkaline phosphatase expression in response to low level laser therapy (Clingen) **187,** 216, *P*
Lectins, Distribution patterns of endogenous lectins during finger development in man (Schmidt, *et al.*) **187,** 230, *dem*
Lectins as markers for the basal cells of the human respiratory epithelium (Bals) **187,** 231, *dem*
The effect of lectins on ciliary beat frequency in the human respiratory tract (Adam, *et al.*) **187,** 232, *dem*
Ultrastructural demonstration of *Helix pomatia* agglutinin (HPA) binding to human breast cancer cell lines (Mitchell, *et al.*) **187,** 232, *dem*
Lectin binding studies of mouse granulated metrial gland cells (Webster & Stewart) **187,** 233, *dem*
Glycobiology: 'The function of sugar in the IgG molecule' (Dwek, *et al.*) **187,** 279
Distribution of lectin binding in the testes of the musk shrew, *Sincus murinus* (Kurohmaru, *et al.*) **187,** 323
Glycoconjugate expression of chondrocytes and perichondrium during hyaline cartilage development in the rat (Zschäbitz, *et al.*) **187,** 67
Superovulation affects glucosamine trisaccharides in the glycocalyx of the rat endometrium at the time of implantation (Peverini & Kramer) **187,** 487
Lesser mouse deer, Morphology of the dorsal lingual papillae in the lesser mouse deer, *Tragulus javanicus* (Agungpriyono, *et al.*) **187,** 635
Levator claviculae muscle, Case report: cleidocervical or levator claviculae muscle. A new embryological explanation as to its origin (Leon, *et al.*) **187,** 503
Leydig cells, The role of pre-Sertoli cells in the induction of Leydig cell differentiation in the mouse testis (McKay & Farrell) **187,** 238, *dem*
Ligament replacement, Collagen fibril diameter distribution in patellar tendon autografts after posterior cruciate ligament reconstruction in sheep: changes over time (Moeller, *et al.*) **187,** 161
Ligaments, Characterisation of the neurosensory elements of the feline cranial cruciate ligament (Koch, *et al.*) **187,** 353
A comparison of spinal ligaments—differences between bipeds and quadrupeds (Jiang, *et al.*) **187,** 85
Lingual papillae, Morphology of the dorsal lingual papillae in the lesser mouse deer, *Tragulus javanicus* (Agungpriyono, *et al.*) **187,** 635
LIP inferior pulvinar, Segregation and convergence of specialised pathways in macaque monkey visual cortex (Shipp & Zeki) **187,** 547
Lipopolysaccharide, Expression and upregulation of transferrin receptors and iron uptake in the epiplexus cells of different aged rats injected with lipopolysaccharide and interferon-gamma (Lu, *et al.*) **187,** 603
Liver, A direct relationship between the population size and the proliferative activity of early blood cell precursors in murine fetal liver (Thomas & Blair) **187,** 204, *P*
L-selectin, Carbohydrate ligands for L-selectin (Bertozzi & Rosen) **187,** 209, *P*
Lumbar facet joints, Fine structure of vesiculated nerve profiles in the human lumbar facet joint (Vandenabeele, *et al.*) **187,** 681
Lymph nodes, A study on binding of suspended nodal lymphocytes to high endothelial venules in sections of frozen rat lymph nodes (Sainte-Marien & Peng) **187,** 47
Lymphatic drainage from the tonsil of the soft palate in pigs (Beltz & Heath) **187,** 491
Lymphatic vessels, Lymphatic drainage from the tonsil of the soft palate in pigs (Beltz & Heath) **187,** 491
Intercellular and lymphatic pathways of the canine palatine tonsils (Beltz & Heath) **187,** 93
Lymphocyte adherence, A study on binding of suspended nodal lymphocytes to high endothelial venules in sections of frozen rat lymph nodes (Sainte-Marien & Peng) **187,** 47
Lymphocyte recruitment, A study on binding of suspended nodal lymphocytes to high endothelial venules in sections of frozen rat lymph nodes (Sainte-Marien & Peng) **187,** 47
Lymphocytes, Not only B but also many T lymphocytes migrate

to the lamina propria of the gut mucosa in pigs (Rothkötters & Pabst) **187,** 206, *P*
Carbohydrate ligands for L-selectin (Bertozzi & Rosen) **187,** 209, *P*
In vivo modulation of sialic acid and its biological effects (Reutter, *et al.*) **187,** 209, *P*
Quantitative analysis of intraepithelial large granular lymphocyte distribution and maternofetal cellular interactions in the synepitheliochorial placenta of the deer (Lee, *et al.*) **187,** 445
Lymphoid tissue, CD44 expression in lymphomas of mucosa-associated lymphoid tissue (Bateman, *et al.*) **187,** 204, *P*
Not only B but also many T lymphocytes migrate to the lamina propria of the gut mucosa in pigs (Rothkötters & Pabst) **187,** 206, *P*
Pathways of blood flow to and through superficial lymph nodes in the dog (Beltz & Heath) **187,** 413
Lymphatic drainage from the tonsil of the soft palate in pigs (Beltz & Heath) **187,** 491
Intercellular and lymphatic pathways of the canine palatine tonsils (Beltz & Heath) **187,** 93
Lymphoma, CD44 expression in lymphomas of mucosa-associated lymphoid tissue (Bateman, *et al.*) **187,** 204, *P*
Lysozyme, Immunocytochemical localisation of lysozyme in epithelial cells of the rat parotid gland (Staneva-Dobrovski & Zanger) **187,** 211, *P*

Macaque monkey, Mapping of human and macaque sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515
Segregation and convergence of specialised pathways in macaque monkey visual cortex (Shipp & Zeki) **187,** 547
Cells and circuits contributing to functional properties in area V1 of macaque monkey cerebral cortex: bases for neuroanatomically realistic models (Lund, *et al.*) **187,** 563
Macrophages, Description of a new population of fixed macrophages in the splenic cords of pigs (Carrasco, *et al.*) **187,** 395
Magnetic resonance angiography, Arterial tortuosity in the femoropopliteal region during knee flexion: a magnetic resonance angiographic study (Wensing, *et al.*) **187,** 133
Magnetic resonance imaging, The sensorimotor cortex of the human and monkey brain: an integrative approach using MRI, histology and receptor autoradiography (Zilles, *et al.*) **187,** 213, *P*
Nondestructive, noninvasive assessment of articular cartilage thickness using magnetic resonance tomography (MRT) (Eckstein, *et al.*) **187,** 235, *dem*
Matrix vesicles, Localisation of alkaline phosphatase in equine growth cartilage (Henson, *et al.*) **187,** 151
Mechanoreceptors, Characterisation of the neurosensory elements of the feline cranial cruciate ligament (Koch, *et al.*) **187,** 353
Meckel's cartilage, Characterisation of glycoconjugate expression during development of Meckel's cartilage (Koepp, *et al.*) **187,** 229, *dem*
Meninges, A morphometric analysis of tight junctions in endothelial cell paracellular clefts of rat pial microvessels (Caffella & Firth) **187,** 235, *dem*
Mesangial cells, Effects of insulin and aldose reductase inhibitor on glomerular mesangial cells in streptozotocin-diabetic rats (Mayhew & Findlay) **187,** 233, *dem*
Mesenchyme, Ultrastructural features of mesenchymal cells within the facial processes forming the intermaxillary segment of the rat (Symons & Moxham) **187,** 241
Characterisation of the morphogenetic course and secretion of two different types of mucoid material by granulated metrial gland/lymphokine-activated killer cells (Dyugovskaya, *et al.*) **187,** 693
Mesenteric lymph nodes, Immunocytochemical study of the ontogeny of the marsupial *Didelphis albiventris* immune system (Coutinho, *et al.*) **187,** 37
Metal alloys, Fine particles of titanium, titanium alloy and cobalt-chrome-molybdenum alloy cause damage by direct contact with cells in vitro (Evans & Love) **187,** 243, *dem*
Metallic particles, Fine particles of titanium, titanium alloy and cobalt-chrome-molybdenum alloy cause damage by direct contact with cells in vitro (Evans & Love) **187,** 243, *dem*
Metrial glands, Characterisation of cells in rat metrial glands with potential for antibody dependent cellular cytotoxic activity (Peel & Stewart) **187,** 239, *dem*
Mice, The probable role of the external granular cells in the maturation of the Purkinje cells in mice (Malta) **187,** 228, *dem*
Semiautomatic morphometry of capillaries in human xenografts after thermochemotherapy (Schmitt, *et al.*) **187,** 234, *dem*
Alterations of the nucleolar organiser regions (AgNORs) in the human MX-1 xenograft after thermochemotherapy as detected by automatic image analysis (Schmitt, *et al.*) **187,** 234, *dem*
Microcirculation, Pathways of blood flow to and through superficial lymph nodes in the dog (Beltz & Heath) **187,** 413
Microglia, Microglial response after application of colchicine on the hypoglossal nerve in rats (Mader, *et al.*) **187,** 223, *dem*
Microtubule-associated proteins, Immunocytochemical localisation of microtuble associated proteins 1b and 2 in the developing rat spinal cord (Oudega, *et al.*) **187,** 723
Microvilli, Stereological methods for estimating the functional surfaces of the chiropteran small intestine (Makanya, *et al.*) **187,** 361
Micturition pelvic ganglia, The anterior major pelvic ganglion and the micturition pathway: a double labelling and indirect immunofluorescence study in the rat (Skidmore) **187,** 226, *dem*
Molecular mimicry, Antibodies against proteins of streptococcal hyaluronate synthase bind to human fibroblasts and are present in patients with rheumatic fever (Prehm, *et al.*) **187,** 271
Monkey, Compartmentalisation of cortical neurons by synapses and neurotransmitter receptors (Somogyi) **187,** 213, *P*
The sensorimotor cortex of the human and monkey brain: an integrative approach using MRI, histology and receptor autoradiography (Zilles, *et al.*) **187,** 213, *P*
Segregation and integration of specialised visual pathways in primate cortex (Shipp & Zeki) **187,** 214, *P*
Cells and circuits contributing to functional properties in macaque monkey visual cortex, areas V1 and V2 (Lund, *et al.*) **187,** 214, *P*
Qualitative and quantitative morphological evaluation of ovarian structures in the marmoset during the oestrous cycle (Wulff & Rune) **187,** 239, *dem*
Morphogenetic protein 2, Effect of recombinant human Bone Morphogenetic Protein 2 (rh BMP 2) on endothelial cell migration and proliferation (Mulhern) **187,** 217, *P*
Motoneurons, The arrangement of motor nuclei in the ventral horn of the cat spinal cord in relation to the innervation of trunk muscles (Kida, *et al.*) **187,** 509, *dem*
Ultrastructural changes associated with increased neuropeptide expression in cranial motoneurons (Kumar & Johnson) **187,** 225, *dem*
The expression of copper/zinc and manganese superoxide dismutase in spinal motoneurons of adult and young Wistar rats following nerve injury (Davies) **187,** 221, *P*
CGRP and galanin-like immunoreactive motoneurons in the axotomised facial nucleus of adult and newborn rats (Desilva, *et al.*) **187,** 225, *dem*
Motor activity, The influence of open field colour on motor behaviour in the mouse—a behavioural study (Maleck, *et al.*) **187,** 245, *dem*
The duration of trials as an important factor in the sex-dependent evaluation of open field motor activity in Wistar rats (Maleck, *et al.*) **187,** 245
Motor cortex, Mapping of human and macaque sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515
Mouse, A direct relationship between the population size and the proliferative activity of early blood cell precursors in murine fetal liver (Thomas & Blair) **187,** 204, *P*

Morphological and parameter profiles of mammalian organs (Carr, *et al.*) **187,** 207, *P*
The effect of low level laser therapy on neuropeptide expression during fracture repair in the murine femur (Jordan) **187,** 216, *P*
Fracture callus maturation and alkaline phosphatase expression in response to low level laser therapy (Clingen) **187,** 216, *P*
Atrophy of myelinated axons following a gestational alcohol insult in a mouse model of the fetal alcohol syndrome is specific to the central nervous system (Parson & Sojitra) **187,** 220, *P*
Ultrastructure of tumours derived from the human colon cancer cell line HT29 developing in severe combined immunodeficiency (SCID) mice (Mitchell, *et al.*) **187,** 231, *dem*
Carbohydrate expression by trophoblast cells of the mouse placenta (Bebington & Stewart) **187,** 233, *dem*
Lectin binding studies of mouse granulated metrial gland cells (Webster & Stewart) **187,** 233, *dem*
Supernumerary teeth and an internal cartilaginous unicorn-like structure are craniofacial features seen in the homozygous Small eye (Sey) mouse (Kaufman) **187,** 237, *dem*
The effect of transforming growth factor-β1 on developing mouse gonads in vitro (Mackay, *et al.*) **187,** 238, *dem*
The effects of gamma-irradiation on serotonin-containing endocrine cells of the murine small intestine (McCullough, *et al.*) **187,** 242, *dem*
Experiences with slam freezing and high pressure freezing (Lemke, *et al.*) **187,** 243, *dem*
The influence of open field colour on motor behaviour in the mouse—a behavioural study (Maleck, *et al.*) **187,** 245, *dem*
Mode of inflammatory cell infiltration in testes of mice injected with syngeneic testicular germ cells without adjuvant (Itoh, *et al.*) **187,** 671
Loss of myelinated axons is specific to the central nervous system in a mouse model of the fetal alcohol syndrome (Parson & Sojitra) **187,** 739
Mouse embryo, Cell death in the developing murine hindbrain occurs after neural crest cell migration (Atkinson & Smith) **187,** 215, *P*
Trigeminal neurotropic factor is produced by the ophthalmic target tissues of the trigeminal nerve but does not determine innervation density (Philp) **187,** 222, *P*
The role of pre-Sertoli cells in the induction of Leydig cell differentiation in the mouse testis (McKay & Farrell) **187,** 238, *dem*
Mouth, The innervation of the rat buccal mucosa (Müller) **187,** 236, *dem*
MRI, Mapping of human and macaque sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515
Mucin, Physical and biosynthetic studies on the large mucins from human intestinal cell lines (Sheehan, *et al.*) **187,** 210, *P*
Glycosylation of mucins in a cultured human colorectal epithelial cell model of the adenoma–carcinoma sequence (Corfield, *et al.*) **187,** 210, *P*
Mucosa, CD44 expression in lymphomas of mucosa-associated lymphoid tissue (Bateman, *et al.*) **187,** 204, *P*
Not only B but also many T lymphocytes migrate to the lamina propria of the gut mucosa in pigs (Rothkötters & Pabst) **187,** 206, *P*
Intestinal uptake of particulates: bulk maceration and histometric epifluorescence study of particule size dependency (Hodges, *et al.*) **187,** 207, *P*
The innervation of the rat buccal mucosa (Müller) **187,** 236, *dem*
Expression of integrins in porcine gastric mucosa: comparison of in vivo and in vitro findings (Giebel, *et al.*) **187,** 243, *dem*
Muscle, Identification of cell type by microdissection and RT-PCR cloning of the cDNA of the predominantly expressed gene(s) (Sant'Ana Pereira, *et al.*) **187,** 205, *P*
Expression of dystrophin in developing muscle (Barbet, *et al.*) **187,** 206, *P*
Description of a new population of fixed macrophages in the splenic cords of pigs (Carrasco, *et al.*) **187,** 395
Muscle fibre type, Histochemical and morphometric characteristics of the normal human vastus medialis longus and vastus medialis obliquus muscles (Travnik, *et al.*) **187,** 403
Muscle fibre typing, Identification of cell type by microdissection and RT-PCR cloning of the cDNA of the predominantly expressed gene(s) (Sant'Ana Pereira, *et al.*) **187,** 205, *P*
Muscle fibre type and elastin distribution in human cricopharyngeus (Matthews) **187,** 221, *P*
Muscle reinnervation, The accuracy of reinnervation of muscle after neonatal nerve crush in rats (Davies & Lowrie) **187,** 220, *P*
Musk shrew, Distribution of lectin binding in the testes of the musk shrew, *Sincus murinus* (Kurohmaru, *et al.*) **187,** 323
Myelin sheath, Patterns of morphological variation within myelin internodes of normal peripheral nerve: quantitative analysis by confocal microscopy (Reynolds & Heath) **187,** 369
Myeloarchitectonics, Mapping of human and macaque sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515
Myenteric plexus, A scanning microscopical study of the isolated myenteric plexus in newborn rats (Schäjer & Mestres-Ventura) **187,** 200, *P*
Myoblasts, The parallel and paradoxically perpendicular orientation of myoblasts on artificial grooved surfaces (Wigmore, *et al.*) **187,** 241, *dem*
Myocardium, The innervation of the human myocardium at birth (Chow, *et al.*) **187,** 107
Myocytes, A stereological method for estimating the total number of ventricular myocyte nuclei in fetal and postnatal hearts (Austin, *et al.*) **187,** 641
Myosin V, Myosin V distribution in PC12 cells indicates a possible role at the growth cone (Davies) **187,** 221, *P*

NADPH diaphorase, Distribution and interrelations between GABA and NADPH-diaphorase labelled neurons in rat autonomic ganglia (Day) **187,** 221, *P*
NADPH-diaphorase, Fixation conditions affect NADPH-diaphorase staining as a marker for brain nitric oxide synthase in the rat olfactory bulb (Spessert, *et al.*) **187,** 198, *P*
Nd:YAG laser, The morphological tissue response of the piglet oesophagus to experimental irradiation by 1320 nm Nd:YAG laser (Stratmann, *et al.*) **187,** 661
Nerve endings, Nerve endings in bronchi of the dog that react with antibodies against neurofilament protein (Yamamoto, *et al.*) **187,** 59
Nerve injury, CGRP and galanin-like immunoreactive motoneurons in the axotomised facial nucleus of adult and newborn rats (Desilva, *et al.*) **187,** 225, *dem*
Neural crest, Cell death in the developing murine hindbrain occurs after neural crest cell migration (Atkinson & Smith) **187,** 215, *P*
Neural specificity, Understanding the cortex through the hippocampus: lamina-specific connections of the rat hippocampal neurons (Frotscher, *et al.*) **187,** 539
Neurofilament protein, Nerve endings in bronchi of the dog that react with antibodies against neurofilament protein (Yamamoto, *et al.*) **187,** 59
Neuronal compartmentalisation, Compartmentalisation of cortical neurons by synapses and neurotransmitter receptors (Somogyi) **187,** 213, *P*
Neuronal degeneration, Effects of long-term malnutrition and rehabilitation on the hippocampal formation of the adult rat. A morphometric study (Andrade, *et al.*) **187,** 379
Neuronal dendrites, Transneuronal changes suggest altered dendritic processing in Alzheimer's disease (Nitsch & Ohm) **187,** 219, *P*
Neuronal vacuolation, Influence of age on the late retrograde effects of sciatic nerve section in the rat (Kerezoudi, *et al.*) **187,** 27
Neurons, Cholinergic, somatostatin-immunoreactive interneurons

in the guinea pig intestine: morphology, ultrastructure, connections and projections (Portbury, *et al.*) **187,** 303
The neurochemical maturation of the rabbit cerebellum (Lossi, *et al.*) **187,** 709
Neuron-specific enolase, Cortical response of neuron-specific enolase after peripheral lesion of the facial nerve (Schubert, *et al.*) **187,** 223, *dem*
Neuropeptide Y, The innervation of the human myocardium at birth (Chow, *et al.*) **187,** 107
Neuropeptides, Development of peptide-containing nerves in the human fetal prostate gland (Jen & Dixon) **187,** 169
Changes of the sensory airway innervation in actively sensitised and challenged guinea pigs (Fischer & Kummer) **187,** 200, *P*
The effect of low level laser therapy on neuropeptide expression during fracture repair in the murine femur (Jordan) **187,** 216, *P*
Ultrastructural changes associated with increased neuropeptide expression in cranial motoneurons (Kumar & Johnson) **187,** 225, *dem*
NPY-positive nerve fibres on motor endplates in the rat oesophagus stain also for VIP and NADPH-diaphorase (Reichel, *et al.*) **187,** 226, *dem*
Neurotransmitters and neuropeptides in the mesencephalic trigeminal nucleus of the cat (Chouchkov & Lazarov) **187,** 229, *dem*
Neurotransmitter receptors, Gephyrin: a bridge between neurotransmitter receptors and the cytoskeleton (Kirsch & Betz) **187,** 215, *P*
Differences in the distribution patterns of transmitter receptors in the human motor and somatosensory cortex as revealed by a new method (Geyer, *et al.*) **187,** 224, *dem*
Neurotropism, Tissue culture analysis of chemotropism during peripheral nerve regeneration (Gu, *et al.*) **187,** 201, *P*
Neutral polysaccharide, Characterisation of the morphogenetic course and secretion of two different types of mucoid material by granulated metrial gland/lymphokine-activated killer cells (Dyugovskaya, *et al.*) **187,** 693
Nitrergic nerve fibres, Nitrergic nerve fibres on motor endplates in the rat oesophagus: an electron and confocal laser scanning microscopy study (Wörl & Neuhuber) **187,** 226, *P*
Nitric oxide, Nitric oxide: a transmitter in the hamster circadian system (Reuss & Decker) **187,** 198, *P*
Nitric oxide synthase, Fixation conditions affect NADPH-diaphorase staining as a marker for brain nitric oxide synthase in the rat olfactory bulb (Spessert, *et al.*) **187,** 198, *P*
Noradrenaline, Pattern of norepinephrine-binding in the brainstem and diencephalon of hibernating and euthermic European hamsters (*Cricetus cricetus*) (Krug, *et al.*) **187,** 228, *dem*
Norepinephrine binding, Pattern of norepinephrine-binding in the brainstem and diencephalon of hibernating and euthermic European hamsters (*Cricetus cricetus*) (Krug, *et al.*) **187,** 228, *dem*
Notochord, Wound healing studies in the chick embryo notochord (England & Gouda) **187,** 241, *dem*
Nuclear magnetic resonance, Glycobiology: 'The function of sugar in the IgG molecule' (Dwek, *et al.*) **187,** 279
Nuclear organizer regions, Alterations of the nucleolar organiser regions (AgNORs) in the human MX-1 xenograft after thermochemotherapy as detected by automatic image analysis (Schmitt, *et al.*) **187,** 234, *dem*
Nuclei, A stereological method for estimating the total number of ventricular myocyte nuclei in fetal and postnatal hearts (Austin, *et al.*) **187,** 641
Nutritional rehabilitation, Effects of long-term malnutrition and rehabilitation on the hippocampal formation of the adult rat. A morphometric study (Andrade, *et al.*) **187,** 379

Oesophagus, Nitrergic nerve fibres on motor endplates in the rat oesophagus: an electron and confocal laser scanning microscopy study (Wörl & Neuhuber) **187,** 226, *P*
NPY-positive nerve fibres on motor endplates in the rat oesophagus stain also for VIP and NADPH-diaphorase (Reichel, *et al.*) **187,** 226, *dem*
The morphological tissue response of the piglet oesophagus to experimental irradiation by 1320 nm Nd:YAG laser (Stratmann, *et al.*) **187,** 661
Olfactory bulb, Fixation conditions affect NADPH-diaphorase staining as a marker for brain nitric oxide synthase in the rat olfactory bulb (Spessert, *et al.*) **187,** 198, *P*
Oligosaccharides, Glycobiology—towards understanding the function of sugars (Dwerk) **187,** 210, *P*
Optic nerve, Optic nerve inputs to the pretectum in intact rats and those bearing intracranial retinal grafts (Murray) **187,** 222, *P*
Loss of myelinated axons is specific to the central nervous system in a mouse model of the fetal alcohol syndrome (Parson & Sojitra) **187,** 739
Orchitis, Mode of inflammatory cell infiltration in testes of mice injected with syngeneic testicular germ cells without adjuvant (Itoh, *et al.*) **187,** 671
Orientation specificity, Cells and circuits contributing to functional properties in area V1 of macaque monkey cerebral cortex: bases for neuroanatomically realistic models (Lund, *et al.*) **187,** 563
Oropharyngeal membrane, The prechordal plate and the oropharyngeal membrane in embryos of man and birds (Hinrichsen, *et al.*) **187,** 203, *P*
Osteoblasts, An evaluation of an optimal serum supplementation regimen for the culture of human osteoblasts prior to reimplantation therapy (McCabe) **187,** 217, *P*
Osteogenesis, Effects of retinyl palmitate and retinoic acid on craniofacial morphogenesis: biological roles of oligosaccharide-lectin interactions during osteogenesis of the maxilla and mandible (Zchäbitz, *et al.*) **187,** 212, *P*
Oestrous cycle, Qualitative and quantitative morphological evaluation of ovarian structures in the marmoset during the oestrous cycle (Wulff & Rune) **187,** 239, *dem*
Ovary, Qualitative and quantitative morphological evaluation of ovarian structures in the marmoset during the oestrous cycle (Wulff & Rune) **187,** 239, *dem*

Pacific hagfish, Observations on the topology of the forebrain of the Pacific hagfish, *Eptatretus stouti* (Tusch, *et al.*) **187,** 227, *dem*
Pain, Nerve damage and other causes of chronic pain after breast cancer surgery (Okasha, *et al.*) **187,** 220, *P*
Palate, Immunolocalisation of decorin within rat palatal shelves prior to and after shelf elevation (Moxham, *et al.*) **187,** 232, *dem*
Palmaris profundus tendon, Carpal tunnel syndrome caused by an anomalous palmaris profundus tendon (Server, *et al.*) **187,** 197
Parallel pathways, Segregation and convergence of specialised pathways in macaque monkey visual cortex (Shipp & Zeki) **187,** 547
Parkinson's disease, Amygdala pathology in Parkinson's disease (Yilmazer, *et al.*) **187,** 219, *P*
Parotid gland, Immunocytochemical localisation of lysozyme in epithelial cells of the rat parotid gland (Staneva-Dobrovski & Zanger) **187,** 211, *P*
Particle uptake, Intestinal uptake of particulates: bulk maceration and histometric epifluorescence study of particule size dependency (Hodges, *et al.*) **187,** 207, *P*
Early uptake of polystyrene latex microparticles (1·88 μm) across the gastrointestinal tract of the rat (Hazzard, *et al.*) **187,** 242, *dem*
Passerine birds, Comparative morphology of the proventriculus of 3 species of Australian passerines, *Lichmera indistincta*, *Zosterops lateralis* and *Poephila gutata* (Ogunkoya & Cook) **187,** 202, *P*
Patellar tendon, Collagen fibril diameter distribution in patellar tendon autografts after posterior cruciate ligament reconstruction in sheep: changes over time (Moeller, *et al.*) **187,** 161
PC12 cells, Myosin V distribution in PC12 cells indicates a possible role at the growth cone (Davies) **187,** 221, *P*
Pelvic bones, Pelvises from Caesarean operations performed on living women in Edinburgh during the late 18th and early 19th century (Kaufman) **187,** 237, *dem*
Perichondrium, Glycoconjugate expression of chondrocytes and

perichondrium during hyaline cartilage development in the rat (Zschäbitz, *et al.*) **187,** 67
Periodontium, Cytoskeletal elements in cementoblasts of the developing rat periodontium (Webb, *et al.*) **187,** 204, *P*
Periosteum, Fibrocartilage associated with human tendons and their pulleys (Benjamin, *et al.*) **187,** 625
Peripheral nerve, Nerve fibre pathology in the cervical vagus of the rat: effects of age (Soltanpour & Santer) **187,** 224, *dem*
Patterns of morphological variation within myelin internodes of normal peripheral nerve: quantitative analysis by confocal microscopy (Reynolds & Heath) **187,** 369
Peripheral nerve injury, Nerve damage and other causes of chronic pain after breast cancer surgery (Okasha, *et al.*) **187,** 220, *P*
The accuracy of reinnervation of muscle after neonatal nerve crush in rats (Davies & Lowrie) **187,** 220, *P*
The expression of copper/zinc and manganese superoxide dismutase in spinal motoneurons of adult and young Wistar rats following nerve injury (Davies) **187,** 221, *P*
Cortical response of neuron-specific enolase after peripheral lesion of the facial nerve (Schubert, *et al.*) **187,** 223, *dem*
Peripheral nerve regeneration, Tissue culture analysis of chemotropism during peripheral nerve regeneration (Gu, *et al.*) **187,** 201, *P*
PET scanning, Mapping of human and macaque sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515
Phagocytosis, Coiling phagocytosis: the neglected uptake mechanism (Dechant, *et al.*) **187,** 243, *dem*
Photoreceptors, Inhibition of serotonin uptake selectively destroys illuminated pineal photoreceptor cells in *Rana esculenta* (Hartwig, *et al.*) **187,** 197, *P*
Immunocytochemical characterisation of retinal photoreceptors and pinealocytes in saurian and ophidian species (Hafeez, *et al.*) **187,** 227, *dem*
Photothermal tissue injury, The morphological tissue response of the piglet oesophagus to experimental irradiation by 1320 nm Nd:YAG laser (Stratmann, *et al.*) **187,** 661
Photothrombosis, Cytoskeletal changes after photothrombosis in the rat brain (Bidman, *et al.*) **187,** 215, *P*
Pia mater, A morphometric analysis of tight junctions in endothelial cell paracellular clefts of rat pial microvessels (Caffella & Firth) **187,** 235, *dem*
Pig, Not only B but also many T lymphocytes migrate to the lamina propria of the gut mucosa in pigs (Rothkötters & Pabst) **187,** 206, *P*
Expression of integrins in porcine gastric mucosa: comparison of in vivo and in vitro findings (Giebel, *et al.*) **187,** 243, *dem*
Description of a new population of fixed macrophages in the splenic cords of pigs (Carrasco, *et al.*) **187,** 395
Cryoscanning electron microscopic study of the surface amorphous layer of articular cartilage (Kobayashi, *et al.*) **187,** 429
Lymphatic drainage from the tonsil of the soft palate in pigs (Beltz & Heath) **187,** 491
Piglet, The morphological tissue response of the piglet oesophagus to experimental irradiation by 1320 nm Nd:YAG laser (Stratmann, *et al.*) **187,** 661
Pineal gland, Calcium responses of isolated rat pinealocytes to noradrenergic and cholinergic stimulation (Schomerus, *et al.*) **187,** 197, *P*
Circadian gene expression in the rat photoneuroendocrine system: is ICER a clock gene? (Stehle, *et al.*) **187,** 197, *P*
Inhibition of serotonin uptake selectively destroys illuminated pineal photoreceptor cells in *Rana esculenta* (Hartwig, *et al.*) **187,** 197, *P*
Immunocytochemical characterisation of retinal photoreceptors and pinealocytes in saurian and ophidian species (Hafeez, *et al.*) **187,** 227, *dem*
Pinealocytes, Calcium responses of isolated rat pinealocytes to noradrenergic and cholinergic stimulation (Schomerus, *et al.*) **187,** 197, *P*
Placenta, Effect of histamine and tumour necrosis factor on the distribution and localisation of cadherin-5 and PECAM-1 in the perfused human term placental microvessels (Leach, *et al.*) **187,** 206, *P*
Carbohydrate expression by trophoblast cells of the mouse placenta (Bebington & Stewart) **187,** 233, *dem*
An immunocytochemical characterisation of the paracellular junctions of the perfused human umbilical vein (Leach & Scott) **187,** 244, *dem*
Quantitative analysis of intraepithelial large granular lymphocyte distribution and maternofetal cellular interactions in the synepitheliochorial placenta of the deer (Lee, *et al.*) **187,** 445
Polypropylene mesh, Reinforcement of the abdominal wall using polypropylene mesh in laparoscopic inguinal hernia repair (Van Mameren, *et al.*) **187,** 202, *P*
Pontine nuclei, Cortical and tectal inputs to the pontine nuclei of the rat (Swales) **187,** 222, *P*
Posterior cruciate ligament, Collagen fibril diameter distribution in patellar tendon autografts after posterior cruciate ligament reconstruction in sheep: changes over time (Moeller, *et al.*) **187,** 161
Prechordal plate, The prechordal plate and the oropharyngeal membrane in embryos of man and birds (Hinrichsen, *et al.*) **187,** 203, *P*
Pregnancy, Collateral arterial blood supply to the pregnant uterus in the sheep (Mounts, *et al.*) **187,** 191
Atrophy of myelinated axons following a gestational alcohol insult in a mouse model of the fetal alcohol syndrome is specific to the central nervous system (Parson & Sojitra) **187,** 220, *P*
Carbohydrate expression by trophoblast cells of the mouse placenta (Bebington & Stewart) **187,** 233, *dem*
Lectin binding studies of mouse granulated metrial gland cells (Webster & Stewart) **187,** 233, *dem*
Characterisation of cells in rat metrial glands with potential for antibody dependent cellular cytotoxic activity (Peel & Stewart) **187,** 239, *dem*
Quantitative analysis of intraepithelial large granular lymphocyte distribution and maternofetal cellular interactions in the synepitheliochorial placenta of the deer (Lee, *et al.*) **187,** 445
Superovulation affects glucosamine trisaccharides in the glycocalyx of the rat endometrium at the time of implantation (Peverini & Kramer) **187,** 487
Primates, Determinants of body shape in primates: man, chimpanzee, gibbon and galago (Witte, *et al.*) **187,** 201, *P*
Cells and circuits contributing to functional properties in area V1 of macaque monkey cerebral cortex: bases for neuroanatomically realistic models (Lund, *et al.*) **187,** 563
Proliferating cell nuclear antigen, Cell death induced by gamma irradiation of developing skeletal muscle (Olivé, *et al.*) **187,** 127
Prostate gland, Development of peptide-containing nerves in the human fetal prostate gland (Jen & Dixon) **187,** 169
Protein gene product 9·5, The innervation of the human myocardium at birth (Chow, *et al.*) **187,** 107
Protein malnutrition, Effects of long-term malnutrition and rehabilitation on the hippocampal formation of the adult rat. A morphometric study (Andrade, *et al.*) **187,** 379
Proteoglycan, Extracellular matrix, supramolecular organisation and shape (Scott) **187,** 259
Tendon response to tensile stress: an ultrastructural investigation of collagen: proteoglycan interactions in stressed tendon (Cribb & Scott) **187,** 423
Proteoglycans, Proteoglycans and the organisation of extracellular matrix (Scott) **187,** 208, *P*
Proventriculus, Comparative morphology of the proventriculus of 3 species of Australian passerines, *Lichmera indistincta*, *Zosterops lateralis* and *Poephila gutata* (Ogunkoya & Cook) **187,** 202, *P*
Psoriasis, Comparison of the dermal vessels and the expression of vascular adhesion molecules in the human fetal, normal adult and psoriatic skin (Perry, *et al.*) **187,** 244, *dem*
Pulmonary neuroepithelium, The pulmonary neuroepithelial endocrine system in mammals, reptiles, amphibians and fish. An immunohistochemical and ultrastructural study (Scheuermann) **187,** 216, *P*
Pulvinar, Segregation and convergence of specialised pathways in macaque monkey visual cortex (Shipp & Zeki) **187,** 547

Quadriceps femoris, Histochemical and morphometric characteristics of the normal human vastus medialis longus and vastus medialis obliquus muscles (Travnik, *et al.*) **187,** 403
Quadrupedalism, A comparison of spinal ligaments—differences between bipeds and quadrupeds (Jiang, *et al.*) **187,** 85
Quadrupeds, A comparison of spinal ligaments—differences between bipeds and quadrupeds (Jiang, *et al.*) **187,** 85
Quail, The pattern of innervation in the quail adrenal gland: an immunocytochemical and histochemical study (Parker, *et al.*) **187,** 199, *P*
The prechordal plate and the oropharyngeal membrane in embryos of man and birds (Hinrichsen, *et al.*) **187,** 203, *P*
Tissue interactions during caudad migration of the wolffian duct in chick-quail chimaeras (Erzner, *et al.*) **187,** 240, *dem*
On the development of the anterior head region in avian embryos (Seifert, *et al.*) **187,** 241, *dem*

Rabbit, Cryoscanning electron microscopic study of the surface amorphous layer of articular cartilage (Kobayashi, *et al.*) **187,** 429
The neurochemical maturation of the rabbit cerebellum (Lossi, *et al.*) **187,** 709
Rabbit embryo, Axis definition in the embryonic disk of the rabbit in vivo and under growth factor mediation in vitro (Viebahn, *et al.*) **187,** 203, *P*
Rat, Cell death induced by gamma irradiation of developing skeletal muscle (Olivé, *et al.*) **187,** 127
Circadian gene expression in the rat photoneuroendocrine system: is ICER a clock gene? (Stehle, *et al.*) **187,** 197, *P*
Calcium responses of isolated rat pinealocytes to noradrenergic and cholinergic stimulation (Schomerus, *et al.*) **187,** 197, *P*
Fixation conditions affect NADPH-diaphorase staining as a marker for brain nitric oxide synthase in the rat olfactory bulb (Spessert, *et al.*) **187,** 198, *P*
Regional differences of intraepidermal nerve fibres in the skin of the rat (Müller) **187,** 199, *P*
Quantitative enzyme histochemical studies on ageing neurons of the trigeminal ganglion of the rat (Adams, *et al.*) **187,** 200, *P*
A scanning microscopical study of the isolated myenteric plexus in newborn rats (Schäjer & Mestres-Ventura) **187,** 200, *P*
The extracellular matrix of the hypogastric and 13th thoracic ganglia and lower urinary tract of young adult and aged rats (Warburton & Santer) **187,** 200, *P*
Tissue culture analysis of chemotropism during peripheral nerve regeneration (Gu, *et al.*) **187,** 201, *P*
Cytoskeletal elements in cementoblasts of the developing rat periodontium (Webb, *et al.*) **187,** 204, *P*
Collagen fibril remodelling in regenerating tendon of the immature rat under ad libitum and restricted diet regimes (Hassan & Matthew) **187,** 205, *P*
Intestinal uptake of particulates: bulk maceration and histometric epifluorescence study of particule size dependency (Hodges, *et al.*) **187,** 207, *P*
Immunocytochemical localisation of lysozyme in epithelial cells of the rat parotid gland (Staneva-Dobrovski & Zanger) **187,** 211, *P*
Understanding the cortex through the hippocampus: lamina-specific connections of rat hippocampal neurons (Frotscher, *et al.*) **187,** 212, *P*
VIP neurons in the rat barrel cortex receive specific thalamocortical input (Staiger, *et al.*) **187,** 214, *P*
Cytoskeletal changes after photothrombosis in the rat brain (Bidman, *et al.*) **187,** 215, *P*
Lamina-specific sprouting in the rat fascia dentata after entorhinal lesion: tracing of sprouting fibres with *Phaseolus vulgaris* leucoagglutinin (PHAL) (Deller, *et al.*) **187,** 215, *P*
The accuracy of reinnervation of muscle after neonatal nerve crush in rats (Davies & Lowrie) **187,** 220, *P*
Distribution and interrelations between GABA and NADPH-diaphorase labelled neurons in rat autonomic ganglia (Day) **187,** 221, *P*
The expression of copper/zinc and manganese superoxide dismutase in spinal motoneurons of adult and young Wistar rats following nerve injury (Davies) **187,** 221, *P*
Cortical and tectal inputs to the pontine nuclei of the rat (Swales) **187,** 222, *P*
Optic nerve inputs to the pretectum in intact rats and those bearing intracranial retinal grafts (Murray) **187,** 222, *P*
Microglial response after application of colchicine on the hypoglossal nerve in rats (Mader, *et al.*) **187,** 223, *dem*
Apoptosis in the postnatal rat spinal cord (Davies, *et al.*) **187,** 223, *dem*
Plasticity of axosomatic GABA-ergic synapses in the hypoglossal nucleus after hypoglossal-facial anastomosis in the rat (Lebek, *et al.*) **187,** 224, *dem*
CGRP and galanin-like immunoreactive motoneurons in the axotomised facial nucleus of adult and newborn rats (Desilva, *et al.*) **187,** 225, *dem*
Nitrergic nerve fibres on motor endplates in the rat oesophagus: an electron and confocal laser scanning microscopy study (Wörl & Neuhuber) **187,** 226, *P*
NPY-positive nerve fibres on motor endplates in the rat oesophagus stain also for VIP and NADPH-diaphorase (Reichel, *et al.*) **187,** 226, *dem*
The anterior major pelvic ganglion and the micturition pathway: a double labelling and indirect immunofluorescence study in the rat (Skidmore) **187,** 226, *dem*
Developmental changes of glycine receptor expression in the rat cerebellum (Lorke, *et al.*) **187,** 227, *dem*
Glycoconjugate expression during hyaline cartilage development in the rat (Zschäbitz, *et al.*) **187,** 230, *dem*
Effects of insulin and aldose reductase inhibitor on glomerular mesangial cells in streptozotocin-diabetic rats (Mayhew & Findlay) **187,** 233, *dem*
Experimental diabetes and the effects of insulin and an aldose reductase inhibitor on epithelial cell number and morphophenotype in rat small intestine (Zoubi, *et al.*) **187,** 233, *dem*
A morphometric analysis of tight junctions in endothelial cell paracellular clefts of rat pial microvessels (Caffella & Firth) **187,** 235, *dem*
The innervation of the rat buccal mucosa (Müller) **187,** 236, *dem*
The effects of prenatal flutamide on testicular descent and adult testicular morphology in the Albino Swiss rat (Kassim, *et al.*) **187,** 237, *dem*
Structural alterations to Sertoli cells following vasectomy in the Albino Swiss rat (Dobson, *et al.*) **187,** 238, *dem*
Characterisation of cells in rat metrial glands with potential for antibody dependent cellular cytotoxic activity (Peel & Stewart) **187,** 239, *dem*
Mammary gland reactions in the rat predictive of (anti)progestational activity in humans (Michna, *et al.*) **187,** 239, *dem*
Early uptake of polystyrene latex microparticles (1·88 μm) across the gastrointestinal tract of the rat (Hazzard, *et al.*) **187,** 242, *dem*
The duration of trials as an important factor in the sex-dependent evaluation of open field motor activity in Wistar rats (Maleck, *et al.*) **187,** 245
Patterns of morphological variation within myelin internodes of normal peripheral nerve: quantitative analysis by confocal microscopy (Reynolds & Heath) **187,** 369
Tendon response to tensile stress: an ultrastructural investigation of collagen: proteoglycan interactions in stressed tendon (Cribb & Scott) **187,** 423
Superovulation affects glucosamine trisaccharides in the glycocalyx of the rat endometrium at the time of implantation (Peverini & Kramer) **187,** 487
Understanding the cortex through the hippocampus: lamina-specific connections of the rat hippocampal neurons (Frotscher, *et al.*) **187,** 539
Expression and upregulation of transferrin receptors and iron uptake in the epiplexus cells of different aged rats injected with lipopolysaccharide and interferon-gamma (Lu, *et al.*) **187,** 603

Calbindin D28k in the olivocerebellar projection. A light and electron microscope study (Scotti) **187,** 649
Glycoconjugate expression of chondrocytes and perichondrium during hyaline cartilage development in the rat (Zschäbitz, *et al.*) **187,** 67
Immunocytochemical localisation of microtuble associated proteins 1b and 2 in the developing rat spinal cord (Oudega, *et al.*) **187,** 723
Rat embryo, Retinoic acid teratogenic pathways inducing skeletal embryological malformations in the craniofacial area. Histochemical and microradiological analysis (Emmanouil-Nikoloussi, *et al.*) **187,** 208, *P*
Effects of retinyl palmitate and retinoic acid on craniofacial morphogenesis: biological roles of oligosaccharide-lectin interactions during osteogenesis of the maxilla and mandible (Zchäbitz, *et al.*) **187,** 212, *P*
Developmental changes of glycine receptor expression in the rat cerebellum (Lorke, *et al.*) **187,** 227, *dem*
Characterisation of glycoconjugate expression during development of Meckel's cartilage (Koepp, *et al.*) **187,** 229, *dem*
Immunolocalisation of decorin within rat palatal shelves prior to and after shelf elevation (Moxham, *et al.*) **187,** 232, *dem*
Developmental toxicity of low concentrations of thalidomide can be detected using rat embryos in human serum culture and by microinjection into the vitelline circulation (Pratten & Cumberland) **187,** 240, *dem*
Ultrastructural features of mesenchymal cells within the facial processes forming the intermaxillary segment of the rat (Symons & Moxham) **187,** 241
Receptor autoradiography, Mapping of human and macaque sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515
Red pulp, Description of a new population of fixed macrophages in the splenic cords of pigs (Carrasco, *et al.*) **187,** 395
Reimplantation therapy, An evaluation of an optimal serum supplementation regimen for the culture of human osteoblasts prior to reimplantation therapy (McCabe) **187,** 217, *P*
Reptiles, Immunocytochemical characterisation of retinal photoreceptors and pinealocytes in saurian and ophidian species (Hafeez, *et al.*) **187,** 227, *dem*
Respiratory epithelium, Changes of the sensory airway innervation in actively sensitised and challenged guinea pigs (Fischer & Kummer) **187,** 200, *P*
Respiratory tract, Lectins as markers for the basal cells of the human respiratory epithelium (Bals) **187,** 231, *dem*
The effect of lectins on ciliary beat frequency in the human respiratory tract (Adam, *et al.*) **187,** 232, *dem*
Retina, Circadian gene expression in the rat photoneuroendocrine system: is ICER a clock gene? (Stehle, *et al.*) **187,** 197, *P*
Optic nerve inputs to the pretectum in intact rats and those bearing intracranial retinal grafts (Murray) **187,** 222, *P*
Immunocytochemical characterisation of retinal photoreceptors and pinealocytes in saurian and ophidian species (Hafeez, *et al.*) **187,** 227, *dem*
Retinacula, Fibrocartilage associated with human tendons and their pulleys (Benjamin, *et al.*) **187,** 625
Retinoic acid, Retinoic acid teratogenic pathways inducing skeletal embryological malformations in the craniofacial area. Histochemical and microradiological analysis (Emmanouil-Nikoloussi, *et al.*) **187,** 208, *P*
Effects of retinyl palmitate and retinoic acid on craniofacial morphogenesis: biological roles of oligosaccharide-lectin interactions during osteogenesis of the maxilla and mandible (Zchäbitz, *et al.*) **187,** 212, *P*
Retinyl palmitate, Effects of retinyl palmitate and retinoic acid on craniofacial morphogenesis: biological roles of oligosaccharide-lectin interactions during osteogenesis of the maxilla and mandible (Zchäbitz, *et al.*) **187,** 212, *P*
Rheumatic fever, Antibodies against proteins of streptococcal hyaluronate synthase bind to human fibroblasts and are present in patients with rheumatic fever (Prehm, *et al.*) **187,** 271
Rheumatoid arthritis, Glycobiology—towards understanding the function of sugars (Dwerk) **187,** 210, *P*
Glycobiology: 'The function of sugar in the IgG molecule' (Dwek, *et al.*) **187,** 279
Ruminants, Morphology of the dorsal lingual papillae in the lesser mouse deer, *Tragulus javanicus* (Agungpriyono, *et al.*) **187,** 635

Sacrum, Incidence of sacralisation/lumbarisation and their effect on the gross anatomy of the human sacrum (Penn, *et al.*) **187,** 236, *dem*
Scandentia, Cardiac musculature of the cranial vena cava in the common tree shrew (*Tupaia glis*) (Endo, *et al.*) **187,** 347
Schmidt–Lanterman incisures, Patterns of morphological variation within myelin internodes of normal peripheral nerve: quantitative analysis by confocal microscopy (Reynolds & Heath) **187,** 369
Schwann cells, Patterns of morphological variation within myelin internodes of normal peripheral nerve: quantitative analysis by confocal microscopy (Reynolds & Heath) **187,** 369
Scoliosis, A comparison of spinal ligaments—differences between bipeds and quadrupeds (Jiang, *et al.*) **187,** 85
Sensorimotor cortex, The sensorimotor cortex of the human and monkey brain: an integrative approach using MRI, histology and receptor autoradiography (Zilles, *et al.*) **187,** 213, *P*
Mapping of human and macaque sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515
Serotonin, The effects of gamma-irradiation on serotonin-containing endocrine cells of the murine small intestine (McCullough, *et al.*) **187,** 242, *dem*
Serotonin uptake, Inhibition of serotonin uptake selectively destroys illuminated pineal photoreceptor cells in *Rana esculenta* (Hartwig, *et al.*) **187,** 197, *P*
Sertoli cells, The role of pre-Sertoli cells in the induction of Leydig cell differentiation in the mouse testis (McKay & Farrell) **187,** 238, *dem*
Structural alterations to Sertoli cells following vasectomy in the Albino Swiss rat (Dobson, *et al.*) **187,** 238, *dem*
Distribution of lectin binding in the testes of the musk shrew, *Sincus murinus* (Kurohmaru, *et al.*) **187,** 323
Sex dependency, The duration of trials as an important factor in the sex-dependent evaluation of open field motor activity in Wistar rats (Maleck, *et al.*) **187,** 245
Sexual dimorphism, Fourier analysis of human soft tissue facial shape: sex differences in normal adults (Ferrario, *et al.*) **187,** 593
Sheep, Collateral arterial blood supply to the pregnant uterus in the sheep (Mounts, *et al.*) **187,** 191
Sialic acid, In vivo modulation of sialic acid and its biological effects (Reutter, *et al.*) **187,** 209, *P*
Skeletal muscle, Histochemical and morphometric characteristics of the normal human vastus medialis longus and vastus medialis obliquus muscles (Travnik, *et al.*) **187,** 403
Case report: cleidocervical or levator claviculae muscle. A new embryological explanation as to its origin (Leon, *et al.*) **187,** 503
Skin, The effects of ageing on cutaneous wound healing in mammals (Aschcroft, *et al.*) **187,** 1
Regional differences of intraepidermal nerve fibres in the skin of the rat (Müller) **187,** 199, *P*
Ontogeny of vascular adhesion molecules in the developing human skin (Davies) **187,** 218, *P*
Comparison of the dermal vessels and the expression of vascular adhesion molecules in the human fetal, normal adult and psoriatic skin (Perry, *et al.*) **187,** 244, *dem*
Immunocytochemical study of the ontogeny of the marsupial *Didelphis albiventris* immune system (Coutinho, *et al.*) **187,** 37
Slice culture, Understanding the cortex through the hippocampus: lamina-specific connections of the rat hippocampal neurons (Frotscher, *et al.*) **187,** 539
Small eye mutation, Supernumerary teeth and an internal cartilaginous unicorn-like structure are craniofacial

features seen in the homozygous Small eye (Sey) mouse (Kaufman) **187,** 237, *dem*

Small intestine, Morphological and parameter profiles of mammalian organs (Carr, *et al.*) **187,** 207, *P*

Intestinal uptake of particulates: bulk maceration and histometric epifluorescence study of particule size dependency (Hodges, *et al.*) **187,** 207, *P*

Experimental diabetes and the effects of insulin and an aldose reductase inhibitor on epithelial cell number and morphophenotype in rat small intestine (Zoubi, *et al.*) **187,** 233, *dem*

The effects of gamma-irradiation on serotonin-containing endocrine cells of the murine small intestine (McCullough, *et al.*) **187,** 242, *dem*

Smooth muscle, Description of a new population of fixed macrophages in the splenic cords of pigs (Carrasco, *et al.*) **187,** 395

Somatosensory cortex, Mapping of human and macaque sensorimotor areas by integrating architectonic, transmitter receptor, MRI and PET data (Zilles, *et al.*) **187,** 515

Somatostatin, Hibernation related reactivity pattern of the central nervous somatostatin system in European hamsters (Nürnberger, *et al.*) **187,** 198, *P*

Cholinergic, somatostatin-immunoreactive interneurons in the guinea pig intestine: morphology, ultrastructure, connections and projections (Portbury, *et al.*) **187,** 303

Spinal cord, Apoptosis in the postnatal rat spinal cord (Davies, *et al.*) **187,** 223, *dem*

The arrangement of motor nuclei in the ventral horn of the cat spinal cord in relation to the innervation of trunk muscles (Kida, *et al.*) **187,** 509, *dem*

Immunocytochemical localisation of microtuble associated proteins 1b and 2 in the developing rat spinal cord (Oudega, *et al.*) **187,** 723

Spinal ligaments, A comparison of spinal ligaments—differences between bipeds and quadrupeds (Jiang, *et al.*) **187,** 85

Spine, Histochemistry of glycoconjugates during fetal development of the human vertebral column (Khaw, *et al.*) **187,** 230, *dem*

Incidence of sacralisation/lumbarisation and their effect on the gross anatomy of the human sacrum (Penn, *et al.*) **187,** 236, *dem*

Fine structure of vesiculated nerve profiles in the human lumbar facet joint (Vandenabeele, *et al.*) **187,** 681

A comparison of spinal ligaments—differences between bipeds and quadrupeds (Jiang, *et al.*) **187,** 85

Spleen, Alpha smooth muscle actin expression and white pulp compartmentalisation in normal and reactive human spleen (Wilkins, *et al.*) **187,** 206, *P*

Immunocytochemical study of the ontogeny of the marsupial *Didelphis albiventris* immune system (Coutinho, *et al.*) **187,** 37

Description of a new population of fixed macrophages in the splenic cords of pigs (Carrasco, *et al.*) **187,** 395

Splenic cords, Description of a new population of fixed macrophages in the splenic cords of pigs (Carrasco, *et al.*) **187,** 395

Sprouting, Understanding the cortex through the hippocampus: lamina-specific connections of the rat hippocampal neurons (Frotscher, *et al.*) **187,** 539

Stereology, A stereological method for estimating the total number of ventricular myocyte nuclei in fetal and postnatal hearts (Austin, *et al.*) **187,** 641

Stomach, Expression of integrins in porcine gastric mucosa: comparison of in vivo and in vitro findings (Giebel, *et al.*) **187,** 243, *dem*

Streptococcal hyaluronate synthase, Antibodies against proteins of streptococcal hyaluronate synthase bind to human fibroblasts and are present in patients with rheumatic fever (Prehm, *et al.*) **187,** 271

Striated muscle, Cell death induced by gamma irradiation of developing skeletal muscle (Olivé, *et al.*) **187,** 127

Subchondral plate, The thickness of the human acetabular subchondral plate and its correlation with articular cartilage thickness (Milz, *et al.*) **187,** 203, *P*

Submucous plexus, An ultrastructural study of the submucous plexus of guinea pig intestine after unilateral vagotomy (Wang, *et al.*) **187,** 613

Superficial brachial artery, An anatomical study and ontogenetic explanation of 23 cases with variations in the main pattern of the human brachio–antebrachial arteries (Rodríguez-Baeza, *et al.*) **187,** 473

Superovulation, Superovulation affects glucosamine trisaccharides in the glycocalyx of the rat endometrium at the time of implantation (Peverini & Kramer) **187,** 487

Superoxide dismutase, The expression of copper/zinc and manganese superoxide dismutase in spinal motoneurons of adult and young Wistar rats following nerve injury (Davies) **187,** 221, *P*

Suprachiasmatic nucleus, Circadian gene expression in the rat photoneuroendocrine system: is ICER a clock gene? (Stehle, *et al.*) **187,** 197, *P*

Synaptic organisation, A comparative study of primary afferents from the brachial and cervical plexuses to the external cuneate nucleus of gerbils (Lan, *et al.*) **187,** 115

Synovium, Synthesis and degradation of hyaluronate by synovia (Prehm) **187,** 208, *P*

Tail tendon, Tendon response to tensile stress: an ultrastructural investigation of collagen: proteoglycan interactions in stressed tendon (Cribb & Scott) **187,** 423

Talus, Three-dimensional surface analysis of young adult human articular cartilage (Bloebaum & Radley) **187,** 293

T-cell activation, In vivo modulation of sialic acid and its biological effects (Reutter, *et al.*) **187,** 209, *P*

Teaching, Evaluation of teaching gross anatomy with integrated lectures, dissection course and seminars dealing with clinical application (Pabst & Rothkötter) **187,** 201, *P*

Teeth, Supernumerary teeth and an internal cartilaginous unicorn-like structure are craniofacial features seen in the homozygous Small eye (Sey) mouse (Kaufman) **187,** 237, *dem*

Tendon, Collagen fibril diameter distribution in patellar tendon autografts after posterior cruciate ligament reconstruction in sheep: changes over time (Moeller, *et al.*) **187,** 161

Collagen fibril remodelling in regenerating tendon of the immature rat under ad libitum and restricted diet regimes (Hassan & Matthew) **187,** 205, *P*

Disposition of collagen fibrils in human tendons (Stolinski) **187,** 235, *dem*

Tendon response to tensile stress: an ultrastructural investigation of collagen: proteoglycan interactions in stressed tendon (Cribb & Scott) **187,** 423

Fibrocartilage associated with human tendons and their pulleys (Benjamin, *et al.*) **187,** 625

Teratogenesis, Retinoic acid teratogenic pathways inducing skeletal embryological malformations in the craniofacial area. Histochemical and microradiological analysis (Emmanouil-Nikoloussi, *et al.*) **187,** 208, *P*

Testis, The effects of prenatal flutamide on testicular descent and adult testicular morphology in the Albino Swiss rat (Kassim, *et al.*) **187,** 237, *dem*

Structural alterations to Sertoli cells following vasectomy in the Albino Swiss rat (Dobson, *et al.*) **187,** 238, *dem*

The role of pre-Sertoli cells in the induction of Leydig cell differentiation in the mouse testis (McKay & Farrell) **187,** 238, *dem*

Distribution of lectin binding in the testes of the musk shrew, *Sincus murinus* (Kurohmaru, *et al.*) **187,** 323

Mode of inflammatory cell infiltration in testes of mice injected with syngeneic testicular germ cells without adjuvant (Itoh, *et al.*) **187,** 671

Thalamic reticular nucleus, Anatomical evidence concerning the role of the thalamus in corticocortical communication: a brief review (Guillery) **187,** 583

Thalamocortical connections, VIP neurons in the rat barrel cortex receive specific thalamocortical input (Staiger, *et al.*) **187,** 214, *P*

Anatomical evidence concerning the role of the thalamus in corticocortical communication: a brief review (Guillery) **187,** 583

Thalamus, Anatomical evidence concerning the role of the thalamus in corticocortical communication: a brief review (Guillery) **187,** 583
Thalidomide, Developmental toxicity of low concentrations of thalidomide can be detected using rat embryos in human serum culture and by microinjection into the vitelline circulation (Pratten & Cumberland) **187,** 240, *dem*
Thermochemotherapy, Semiautomatic morphometry of capillaries in human xenografts after thermochemotherapy (Schmitt, *et al.*) **187,** 234, *dem*
Alterations of the nucleolar organiser regions (AgNORs) in the human MX-1 xenograft after thermochemotherapy as detected by automatic image analysis (Schmitt, *et al.*) **187,** 234, *dem*
Thymus, Immunocytochemical study of the ontogeny of the marsupial *Didelphis albiventris* immune system (Coutinho, *et al.*) **187,** 37
Titanium, Fine particles of titanium, titanium alloy and cobalt-chrome-molybdenum alloy cause damage by direct contact with cells in vitro (Evans & Love) **187,** 243, *dem*
Tongue, Morphology of the dorsal lingual papillae in the lesser mouse deer, *Tragulus javanicus* (Agungpriyono, *et al.*) **187,** 635
Tonsil, Lymphatic drainage from the tonsil of the soft palate in pigs (Beltz & Heath) **187,** 491
Intercellular and lymphatic pathways of the canine palatine tonsils (Beltz & Heath) **187,** 93
Tragulina, Morphology of the dorsal lingual papillae in the lesser mouse deer, *Tragulus javanicus* (Agungpriyono, *et al.*) **187,** 635
Tragulus javanicus, Morphology of the dorsal lingual papillae in the lesser mouse deer, *Tragulus javanicus* (Agungpriyono, *et al.*) **187,** 635
Transferrin receptors, Expression and upregulation of transferrin receptors and iron uptake in the epiplexus cells of different aged rats injected with lipopolysaccharide and interferon-gamma (Lu, *et al.*) **187,** 603
Transforming growth factor β, The effect of transforming growth factor-β1 on developing mouse gonads in vitro (Mackay, *et al.*) **187,** 238, *dem*
Trigeminal ganglion, Quantitative enzyme histochemical studies on ageing neurons of the trigeminal ganglion of the rat (Adams, *et al.*) **187,** 200, *P*
Trigeminal nerve, Neurotransmitters and neuropeptides in the mesencephalic trigeminal nucleus of the cat (Chouchkov & Lazarov) **187,** 229, *dem*
Trigeminal neurotropic factor, Trigeminal neurotropic factor is produced by the ophthalmic target tissues of the trigeminal nerve but does not determine innervation density (Philp) **187,** 222, *P*
Trophoblast, Carbohydrate expression by trophoblast cells of the mouse placenta (Bebington & Stewart) **187,** 233, *dem*
Tumour necrosis factor, Effect of histamine and tumour necrosis factor on the distribution and localisation of cadherin-5 and PECAM-1 in the perfused human term placental microvessels (Leach, *et al.*) **187,** 206, *P*
Tyrosine hydroxylase, The innervation of the human myocardium at birth (Chow, *et al.*) **187,** 107

Umbilical vein, An immunocytochemical characterisation of the paracellular junctions of the perfused human umbilical vein (Leach & Scott) **187,** 244, *dem*
Undernutrition, The probable role of the external granular cells in the maturation of the Purkinje cells in mice (Malta) **187,** 228, *dem*
Urinary tract, The extracellular matrix of the hypogastric and 13th thoracic ganglia and lower urinary tract of young adult and aged rats (Warburton & Santer) **187,** 200, *P*
Uterus, Collateral arterial blood supply to the pregnant uterus in the sheep (Mounts, *et al.*) **187,** 191
Lectin binding studies of mouse granulated metrial gland cells (Webster & Stewart) **187,** 233, *dem*
Characterisation of cells in rat metrial glands with potential for antibody dependent cellular cytotoxic activity (Peel & Stewart) **187,** 239, *dem*
Superovulation affects glucosamine trisaccharides in the glycocalyx of the rat endometrium at the time of implantation (Peverini & Kramer) **187,** 487

V4, Segregation and convergence of specialised pathways in macaque monkey visual cortex (Shipp & Zeki) **187,** 547
V5, Segregation and convergence of specialised pathways in macaque monkey visual cortex (Shipp & Zeki) **187,** 547
Vagotomy, Nerve endings in bronchi of the dog that react with antibodies against neurofilament protein (Yamamoto, *et al.*) **187,** 59
An ultrastructural study of the submucous plexus of guinea pig intestine after unilateral vagotomy (Wang, *et al.*) **187,** 613
Vagus nerve, Changes of the sensory airway innervation in actively sensitised and challenged guinea pigs (Fischer & Kummer) **187,** 200, *P*
Nerve fibre pathology in the cervical vagus of the rat: effects of age (Soltanpour & Santer) **187,** 224, *dem*
Varicose veins, Wall thickness distribution in relation to valves in varicose long saphenous veins (Campbell, *et al.*) **187,** 234, *dem*
Vascular, Migration of endothelial cells in vitro: effects of glycolytic and oxidative metabolites (Murray & Wilson) **187,** 207, *P*
Vascular adhesion molecules, Ontogeny of vascular adhesion molecules in the developing human skin (Davies) **187,** 218, *P*
Vasculature, Semiautomatic morphometry of capillaries in human xenografts after thermochemotherapy (Schmitt, *et al.*) **187,** 234, *dem*
A morphometric analysis of tight junctions in endothelial cell paracellular clefts of rat pial microvessels (Caffella & Firth) **187,** 235, *dem*
Vasculature, Arterial tortuosity in the femoropopliteal region during knee flexion: a magnetic resonance angiographic study (Wensing, *et al.*) **187,** 133
Effect of histamine and tumour necrosis factor on the distribution and localisation of cadherin-5 and PECAM-1 in the perfused human term placental microvessels (Leach, *et al.*) **187,** 206, *P*
Migration of endothelial cells in vitro: effects of glycolytic and oxidative metabolites (Murray & Wilson) **187,** 207, *P*
Unusual cells isolated from bovine aorta are CD11a/CD18 positive (Spanel-Borowski, *et al.*) **187,** 211, *P*
Wall thickness distribution in relation to valves in varicose long saphenous veins (Campbell, *et al.*) **187,** 234, *dem*
An atypical anastomosis between the inferior vena cava and the right external iliac vein (Maleck, *et al.*) **187,** 236, *dem*
Comparison of the dermal vessels and the expression of vascular adhesion molecules in the human fetal, normal adult and psoriatic skin (Perry, *et al.*) **187,** 244, *dem*
Pathways of blood flow to and through superficial lymph nodes in the dog (Beltz & Heath) **187,** 413
An anatomical study and ontogenetic explanation of 23 cases with variations in the main pattern of the human brachio–antebrachial arteries (Rodríguez-Baeza, *et al.*) **187,** 473
Vasectomy, Structural alterations to Sertoli cells following vasectomy in the Albino Swiss rat (Dobson, *et al.*) **187,** 238, *dem*
Vastus medialis, Histochemical and morphometric characteristics of the normal human vastus medialis longus and vastus medialis obliquus muscles (Travnik, *et al.*) **187,** 403
Veins, Wall thickness distribution in relation to valves in varicose long saphenous veins (Campbell, *et al.*) **187,** 234, *dem*
An atypical anastomosis between the inferior vena cava and the right external iliac vein (Maleck, *et al.*) **187,** 236, *dem*
Vena cava, Cardiac musculature of the cranial vena cava in the common tree shrew (*Tupaia glis*) (Endo, *et al.*) **187,** 347
Ventricles, A stereological method for estimating the total number of ventricular myocyte nuclei in fetal and postnatal hearts (Austin, *et al.*) **187,** 641
Vertebral artery, Course of the caudal hypoglossal rootlet through the vertebral artery (De Caro, *et al.*) **187,** 499
Vesiculated nerve profiles, Fine structure of vesiculated nerve

profiles in the human lumbar facet joint (Vandenabeele, *et al.*) **187,** 681

Villi, Stereological methods for estimating the functional surfaces of the chiropteran small intestine (Makanya, *et al.*) **187,** 361

VIP neurons, VIP neurons in the rat barrel cortex receive specific thalamocortical input (Staiger, *et al.*) **187,** 214, *P*

Virus-receptor interaction, In vivo modulation of sialic acid and its biological effects (Reutter, *et al.*) **187,** 209, *P*

Visual cortex, Compartmentalisation of cortical neurons by synapses and neurotransmitter receptors (Somogyi) **187,** 213, *P*

Excitatory and inhibitory horizontal connections in the cat visual cortex—a structural basis for functional specificity (Eysel & Kisvarday) **187,** 213, *P*

Cells and circuits contributing to functional properties in macaque monkey visual cortex, areas V1 and V2 (Lund, *et al.*) **187,** 214, *P*

Segregation and integration of specialised visual pathways in primate cortex (Shipp & Zeki) **187,** 214, *P*

Segregation and convergence of specialised pathways in macaque monkey visual cortex (Shipp & Zeki) **187,** 547

Cells and circuits contributing to functional properties in area V1 of macaque monkey cerebral cortex: bases for neuroanatomically realistic models (Lund, *et al.*) **187,** 563

Vitreous humour, Extracellular matrix, supramolecular organisation and shape (Scott) **187,** 259

Wolffian duct, Tissue interactions during caudad migration of the wolffian duct in chick-quail chimaeras (Erzner, *et al.*) **187,** 240, *dem*

Wound healing, The effects of ageing on cutaneous wound healing in mammals (Aschcroft, *et al.*) **187,** 1

Wound healing studies in the chick embryo notochord (England & Gouda) **187,** 241, *dem*

X-irradiation, Morphological and parameter profiles of mammalian organs (Carr, *et al.*) **187,** 207, *P*

Zinc iodide–osmic acid stain, Ultrastructure of the zinc iodide–osmic acid stained cells in guinea pig small intestine (Zhou & Komuro) **187,** 481
